G/TBT/N/ALB/27	Republic of Albania - The ionising radiation his draft Law presents some additional and changes (amendments) of Law No 8025, dated 9 November 1995 on "Protection by the ionising radiation" which defines the conditions of protection by the ionizing radiation in order to protect humans and the environment from the risks of radiation. These additions and changes refer to the changes in the safety and assurance documents of the radiation source of the International Agency for Atomic Energy. These changes consist of: the additions related to the safety and assurance of radiation source ensuring the using of ionizing radiation; ensuring the technical control of equipments and source of ionizing radiation; obliging of the physical and legal persons to do technical controls of equipment and sources of ionizing radiation; creating the Protection Commission from the radiation; etc.	15/01/08
G/TBT/N/ALB/28	Republic of Albania - Certification and Inspection Bodies in the field of vegetation and animal pr[...]uction and products called BIO This draft Decision of Council of Ministers regulates the structure, function, criteria of acceptance and assessment of necessary documents and obligations of certification bodies. It is based on Article 4 and 18 of Law No 9199, dated 26 February.2004 "On production, process, certification and place in the market of products called "BIO". It defines obligations of the certification bodies, demands and documents that a private and state body (domestic and foreign) have to fulfil in order to register as a certification body, tariffs of service. It sets the provisions related to the prevention of conflict of interest in the activity of certification bodies. It charges the State Commission for Organic Production (KSHPO) to register the private or state certification bodies, which can be domestic or foreign bodies, being expert in the field of vegetation and animal production, processing of products called "BIO". The State Commission for Organic Production registers within 30 days the certification body, registering it in the register according to the model presented in Annex 1/A and keeps under control the activity of registered certification bodies. This control includes the audit of the procedures of certification, decisions, structures, administrative systems and units of organic production certified from the certification body. The State Commission for Organic Production give the certificate of registration to certification body in which defines the field/fields of its activity/activities. It defines the demands for registration of inspection bodies, the documents that each physic and legal persons (domestic or foreign) must fulfil to register as an inspection body.	17/01/08
G/TBT/N/ALB/29	Republic of Albania – Tobacco It presents some changes of Article 3 of Law No 9636 in which is added paragraph 18 as follows: 18. <i>Ingredient</i> is each substance and component except for tobacco leaf and other natural and raw part of tobacco used in processing of tobacco products and that there is in accomplished product, ever so in change form including the letter, filter, colour and adhesives. It also changes the Article 4, in which the third sentence changes as follows: In each cigarette case or packet of tobacco products must set the warning messages for the damages that the smoking causes in the human health. This messages must be written in the Albanian language, clearly, obviously and legible. These must cover 40 percent of frontal side and 40 percent of back side.	23/01/08
G/TBT/N/ALB/30	Republic of Albania - Blood and its products The rules and measures consist among others on some technical measures for safety in blood transfusion; the obligation for a HIV control of blood and its products from donors even in urgent cases; detailed rules for HIV/AIDS test methods issued by the Minister of health	28/01/08

G/TBT/N/CHN/329	The People's Republic of China - AC contactors This standard specifies the energy efficiency grades, minimum allowable values of energy efficiency, evaluating values of energy conservation and test methods for AC contactors. It applies to AC contactors with rated frequency of 50Hz, rated voltage no more than 1140V and rated current between 9A and 630A. It does not apply to the contactors with additional energy conservation devices and semiconductor contactors (solid contactors).	29/01/08
G/TBT/N/CHN/330	The People's Republic of China - Computer monitors This standard specifies the energy efficiency grades, minimum allowable values of energy efficiency, evaluating values of energy conservation, target minimum allowable values of energy efficiency, test methods and inspection rules for normal computer monitors. It applies to computer monitors rely on a cathode-ray tube (CRT) or liquid crystal display (LCD) in normal working conditions with the voltage of grid. It also covers the display devices for computer with tuner/receiver.	29/01/08

G/TBT/N/CHN/331	The People's Republic of China - Copy machines This standard specifies the energy efficiency grades, minimum allowable values of energy efficiency, evaluating values of energy conservation, target minimum allowable values of energy efficiency, test methods and inspection rules for normal copy machines. It applies to the static-electricity copier with the media size of A3 or less in normal working conditions with the voltage of grid, and the multifunction devices with the fundamental function of duplication, including multifunctional digital copier, multifunctional printer-copier, colour copier and so on.	29/01/08
G/TBT/N/CHN/332	The People's Republic of China - Electrical storage water heaters This standard specifies the energy efficiency grades, minimum allowable values of energy efficiency, evaluating values of energy conservation, test methods and target minimum allowable values of energy efficiency for electrical storage water heaters. It applies to electrical storage water heaters.	29/01/08
G/TBT/N/CHN/333	The People's Republic of China - Uninterruptible power system This standard specifies the general and safety requirements for UPS used in operator access areas. It applies to electronic uninterruptible power systems (UPS) with electrical energy storage devices in d.c. link, but does not cover d.c. supplied electronic ballasts and UPS based on rotating machines.	29/01/08
G/TBT/N/CHN/334	The People's Republic of China - Uninterruptible power system This standard specifies the general and safety requirements for UPS used in restricted access locations. It applies to electronic uninterruptible power systems (UPS) with electrical energy storage devices in d.c. link, but does not cover d.c. supplied electronic ballasts and UPS based on rotating machines.	30/01/08
G/TBT/N/CHN/335	The People's Republic of China - Electric furnace This standard specifies the particular requirements of human safety and installation safety for electroheat installations with explosive atmosphere. It applies to electroheat installations with explosive atmosphere, such as workpieces desiccating after soaking with flammability and explosible solutions or spraying paint, dry furnace used for solidify and other similar products. These requirements do not apply to electroheat installations with protective atmosphere and controlled atmosphere.	30/01/08
