KOR/463	13/01/2014	14/03/2014	Livestock products	<p>Republic of Korea - Livestock products (in Korean) Regulation for the Labelling of Livestock Products The regulation for the labeling of livestock products has been revised in order to simplify labeling method and prevent obligators' confusion. Harmonizes calorie labelling in the net quantity of contents, precautionary labelling, Standard on nutrient content label with 'Labelling Standards on Foods': Revises calorie labelling in the net quantity of contents from calories of one serving to that of quantity of contents. Adds contact points for report on defective and/or adulterated livestock products and caffeine information on the precautionary labelling. Revises nutrient content label in the sub-criteria of livestock products to harmonize with food labelling standards. Reflects new category established to 'Proposed Draft Amendments to the Processing Standards and Ingredient Specifications for Livestock Products': Revises the name of categories: "seasoned meat" etc. 'Natural casing' in the category of livestock processed products is exceptionally classified from the definition of "natural". Establishes standard on one-serving for new category: "fermented sausages", etc.[Table 3] Improves an allowable error setting between labelled quantity of contents and quantity of actual amounts. [Proposal-Appendix 2] [Appendix 2] Revises an allowable error that the shortage amount was resulted by labelled quantity of contents amount and quantity of actual amount, to be classified by weight and capacity from category. Reflects recently-revised contents of the Korean nutrient intake standards and nutrient standards chart. Applied in accordance with the Korean nutrient intake standard revised in 2010. Includes 'Sejong Metropolitan Autonomous City' in the Producer Code for eggshell marking. With a recent establishment of 'Sejong Metropolitan Autonomous City' a new city code(#17) was added to the 'City and Province Number' for 'Producer Code' on eggshell. Complements the definition of 'macronutrient' and 'micronutrient' in nutrition contents label. Corrects errors in the lists of each nutrient ingredient: detail labelling method Indicates differences in nutrient contents level by subdividing 'nutrient highlighting label' into each nutrient that corresponds to 'macronutrient' and 'micronutrient'. Expands livestock products category subject to labelling, which includes processed meat products manufactured and/or sold by processed instant meat distributors.</p>
