G/TBT/N/BHR/30	Kingdom of Bahrain - Canned pears This draft technical regulation specifies the requirements stated in the Gulf standard GSO "Canned Pears" under clauses 8 & 9 (packaging & labelling) as mandatory requirements. It indicates that containers shall be clean & shall prevent any changes in product properties. It also describes label requirements such as : name of the product " Canned pears ", Colour additive's name and number, any flavouring which characterizes the product, etc. http://www.gso.org.sa/gso/home.do	25/02/08
G/TBT/N/BHR/31	Kingdom of Bahrain - Certain pulses This draft technical regulation specifies the requirements stated in the Gulf standard GSO 837 "Certain pulses" under clauses 6 & 7 (packaging, transportation, & labelling) as mandatory requirements. It indicates that Pulses shall be packed in containers that are safeguarded, clean, un-hazardous to human health, not used before and does not lead to contamination. It also indicates that Product containers shall be transported in such a way as to protect them from damage and contamination. It describes the labelling requirements such as: - Year of harvest (month – year); - Product name; - Country of origin http://www.gso.org.sa/gso/home.do	25/02/08
G/TBT/N/BHR/32	Kingdom of Bahrain - Creams, prepared creams and dried creams This technical regulation draft specifies the requirements stated in the Gulf standard GSO "Creams, prepared creams & dried creams" under clauses 8 & 9 (packaging & labelling) as mandatory requirements. It indicates that product shall be packed in healthy, tightly sealed containers that will protect the product from damage and contamination. It describes the food labelling requirements such as: - Type of product; - Type of heat treatment; - Minimum limit of Milk Fat; - List of additives & milk content; - Other requirements. http://www.gso.org.sa/gso/home.do	25/02/08
G/TBT/N/BHR/33	Kingdom of Bahrain - Frozen grape leaves This technical regulation draft specifies the requirements stated in the Gulf standard GSO "Frozen Grape Leaves" under clauses 5, 8 and 9 (packaging, transportation and labelling) as mandatory requirements. It indicates that the product shall be packed in containers which will protect it from contamination, product dryness, leakage or any other undesirable characteristics. It also specifies what should be labelled on each container, such as the phrase "Frozen Grape Leaves" and the shelf life of the product. http://www.gso.org.sa/gso/home.do	25/02/08
G/TBT/N/BHR/34	Kingdom of Bahrain - Processed cereal - based foods for infants and young children This draft technical regulation specifies the requirements stated in the Gulf standard GSO "Infants and children food: processed cereal - based foods for infants and young children" under clauses 9 and 10 (packaging and labeling) as mandatory requirements. It indicates that product shall be packed in safe & suitable containers. It also describes label	25/02/08

G/TBT/N/*	Miembro/Producto	SDD
	requirements such as : name of the product, list of composition, nutrition value, shelf-life...etc. http://www.gso.org.sa/gso/home.do	
G/TBT/N/BHR/35	Kingdom of Bahrain - Instant noodles This draft technical regulation specifies the requirements stated in the Gulf standard GSO "Instant noodles" under clauses 8 and 11 (packaging and labelling) as mandatory requirements. It indicates that the product shall be packed in clean, dry and tightly sealed containers and the internal surface in contact with food shall not react with the contents. It also describes what should be labelled on each container such as: - Product name; - Net weight in gram; - Cooking instructions; - Product flavor such as (Curry, chicken, onion, --- other); - Product expiry date, the shelf life of the product shall be not exceed 9 months from the production date http://www.gso.org.sa/gso/home.do	25/02/08
G/TBT/N/BHR/36	Kingdom of Bahrain - Milk fat products This draft technical regulation specifies the requirements stated in the Gulf standard GSO "Milk fat products" under clauses 7 and 8 (packaging, transportation and labelling) as mandatory requirements. It indicates that product shall be packed in safe and suitable containers. It also describes label requirements such as: name of the product, additive's name and number, type of animal or animal of which milk fat was produced...etc. http://www.gso.org.sa/gso/home.do	
G/TBT/N/BHR/37	Kingdom of Bahrain - Omani halwa This draft technical regulation specifies the requirements stated in the Gulf standard GSO "Omani Halwa" under clauses 5 and 8 (packaging, transportation, and labelling) as mandatory requirements. It indicates that the product shall be packed in clean, safe and dry containers that are well sealed to prevent contamination or changes in product characteristics. It also indicates that product containers shall be transported in such a way as to protect them from damage and contamination. It describes the labelling requirement such as : Product name (Omani Halwa), ingredients, country of manufacture, manufacturer's name and address, production and expiry dates which shall not exceed 3 months from date of manufacture and approximate weight. http://www.gso.org.sa/gso/home.do	25/02/08
G/TBT/N/BHR/38	Kingdom of Bahrain - Soy protein products This draft technical regulation specifies the requirements stated in the Gulf standard GSO "Soy Protein Products" under clauses 6 and 10 (packaging and labelling) as mandatory requirements. It indicates that product shall be packed in a clean and convenient container that will maintain the product in a dry and clean form during transportation, storage and handling. It describes the labelling requirements such as: type and name of product, acceptable health claims, product style, list of additives, vitamins and minerals, expiry date and other requirements. http://www.gso.org.sa/gso/home.do	25/02/08
G/TBT/N/BHR/39	Kingdom of Bahrain – Sugar This draft technical regulation specifies the requirements stated in the Gulf standard GSO 148 "Sugar" under clauses 6 and 8 (packaging, transportation and labelling) as mandatory requirements. It indicates that product shall be packed in containers that will protect the product from humidity, undesirable smells or taste and shall maintain the product characteristics. It also indicates that product shall be transported in such a way as to protect them from damage and contamination. It describes labelling requirements to : - Additives (if any) and its mass percentage; - Sugar style; - Other requirements. http://www.gso.org.sa/gso/home.do	25/02/08

G/TBT/N/CHN/338	China - Inner liner for cigarette, cigarettes	26/02/08
G/TBT/N/CHN/339	China – Cigarettes	26/02/08
G/TBT/N/CHN/340	China - Shopping plastics bags This standard specifies that the minimum thickness of shopping plastics bags must not be less than 0.025mm, and should have environment, safety statements and identification/markings. The safety physical and chemical properties of shopping plastics bags intended for contacting with foods should accord with the requirements of the corresponding sanitation standards	29/02/08
G/TBT/N/DEU/5	Germany - Products of seals (Pinnipedia) The importation, processing and placing on the market of seal products for profit-making into or within Germany will be prohibited. Taking along seal products for private use continues to be allowed. The use of seal products for diagnostic, training and research purposes or for the purpose of taxidermy also remains possible. Moreover, seal products may be imported subject to approval if the animals have been killed prior to the entry into force of the Act or as part of the traditional hunting practised by the Inuit. These seal products may subsequently be further processed and marketed in Germany without any further approval being needed. This is also possible, subject to approval, if the products have been imported into Germany from another EU Member State and if the seals had been culled in a traditional manner by the Inuit. Moreover, special rules for cases of hardship and a transitional arrangement have been included.	28/02/08
G/TBT/N/DNK/74	Denmark - Packaging for beer, carbonised and non carbonised soft drinks and mineral water, spring [...]ter, water, alcopops and cider The draft Statutory Order eases the administrative and economical burdens on producers and importers while testing the market for new products. Marking requirements for disposable packaging kept in a stockroom is specified. A handling remuneration shall be paid to registered grocery stores for sorting of empty disposable packaging similar to the present system for refillable packaging. In continuation of the present and a former investment programme subsidies shall be paid to registered grocery stores for measures to increase efficiency of the sorting of packaging accepted as returns in the store's bottle department. Deposits which have not been redeemed can be used to cover more items of expenditure which till now have been paid via the fees on packaging paid by producers and importers. The date of the repeal of the Statutory Order is altered from 4 September 2008 to 4 September 2013.	19/02/08
G/TBT/N/EEC/179	European Communities - Mobile communication services on aircraft	04/02/08
G/TBT/N/EEC/180	European Communities - Magnetic toys	06/02/08

G/TBT/N/EEC/184	European Communities – Toys	27/02/08
G/TBT/N/FIN/20/Corr.1	Finland - Alcoholic beverages - Corrigendum The act regarding warning labelling on alcoholic beverages has been withdrawn. Consequently, the notification G/TBT/N/FIN/20 dated 25 September 2007, is null and void.	26/02/08
G/TBT/N/FIN/23	Finland - Tobacco products	15/02/08
G/TBT/N/GBR/17	United Kingdom - Cigarettes and hand-rolling tobacco	28/02/08
G/TBT/N/IDN/18	Indonesia - Helmet for Drivers and Passengers of Motor Cycles Draft Decree of Ministry of Industry on Mandatory Indonesia National Standard for Helmet for Drivers and Passengers Motor Cycle, SNI 1811:2007 (5 pages, in Indonesia language); (This standard has complied to International Standards such as JIS T 8133:2000, E/ECE/324. E/ECE/TRANS/505 Regulation No. 22).	05/02/08
G/TBT/N/IDN/19	Indonesia - Tank Steel for LPG Decree of Minister of Industry No. 92/M-IND/PER/11/2007 on Mandatory Implementation of Indonesia National Standard for 5 industry products	05/02/08
G/TBT/N/ISR/193	Israel - Instant Coffee This amendment permits to add to the label the name of country of origin of the coffee beans, only if the information can be verified and if the packed coffee originated from a single country and is of a single brand.	13/02/08
G/TBT/N/ISR/194	Israel - Instant Coffee This amendment deletes the requirement to test the carbohydrate content in instant coffee.	13/02/08
G/TBT/N/ISR/195	Israel - Hoses for fire-fighting equipment The new standard is the adoption, with slight changes and deviations, of the European standard EN14540 (2004). The changes concern the scope of the standard which deals with all kinds of fire-fighting hoses (and not only with hoses for fixed systems), and the change of low temperature testing which will be performed at -5°C (to adapt to local conditions).	13/02/08
G/TBT/N/ISR/196	Israel – Toys The phthalate DINP (Di-isononyl-phthalate), which appears in the Mandatory Standard SI 562 part 3, has been removed from the list of the phthalates prohibited from use in toys and in teething rings. This was approved by the Israeli Ministry of Health and the Technical Committee at The Standards Institution of Israel (SII), following a request to reconsider the composition of the list, submitted by the American Chemistry Council and the ECPI – European Council for Plasticisers and Intermediates, in Brussels, Belgium.	13/02/08
G/TBT/N/ITA/9	Italy - Pyrotechnic products	05/02/08
G/TBT/N/JAM/12	Jamaica - Portland cement Jamaican Standard Specification for Portland Cement (Ordinary and Rapid - Hardening). This standard gives the specification requirements for the chemical and physical properties of Portland Cement (Ordinary and Rapid-Hardening). Methods of sampling and testing are also included. http://www.jbs.org.jm/	28/02/08
G/TBT/N/JAM/10	Jamaica - Fluoridated iodized salt Jamaican Standard Specification for Fluoridated Iodized Salt-Food grade salt. This standard prescribes requirements for fluoridated iodized salt, which is intended for human consumption as well as for food processing. Particle size, packaging and information to be placed on labels are addressed. Test methods to determine the constituents, impurities, and moisture are also detailed. http://www.jbs.org.jm/	28/02/08

G/TBT/N/JAM/11	Jamaica - Hydraulic cements Jamaican Standard for Physical Test Methods for Hydraulic Cements. This standard outlines Physical Test Methods for Hydraulic cements as well as preparation of cement sample for testing. http://www.jbs.org.jm/	28/02/08
G/TBT/N/JAM/12	Jamaica - Portland cement Jamaican Standard Specification for Portland Cement (Ordinary and Rapid - Hardening). This standard gives the specification requirements for the chemical and physical properties of Portland Cement (Ordinary and Rapid-Hardening). Methods of sampling and testing are also included. http://www.jbs.org.jm/	28/02/08
G/TBT/N/JAM/13	Jamaica - Cement Jamaican Quality Management Requirements for Manufacturers, Processors and Packers of Cement. This standard outlines the quality management system that must be in place by all organizations manufacturing, packaging or involved in any processing of cement for sale in Jamaica. http://www.jbs.org.jm/	28/02/08
G/TBT/N/JAM/14	Jamaica - Blended hydraulic cements Jamaican Standard Specification for Blended Hydraulic Cements. This standard gives the specification requirements for the chemical and physical properties of Blended Hydraulic Cements. Included also are key terminologies and definitions as well as the various cement type classifications. http://www.jbs.org.jm/	28/02/08
G/TBT/N/JAM/15	Jamaica - Hydraulic cements Jamaican Standard for Chemical Test Methods for Hydraulic Cements. This standard outlines Chemical Test Methods for Hydraulic cements as well as preparation of cement sample for testing. http://www.jbs.org.jm/	28/02/08
G/TBT/N/JAM/16	Jamaica - Building types with total floor area up to 300m ² (3,000ft ²) Small Building Code and Jamaica Application Document for the International Residential Code (SBC/JADIRC). The SBC/JADIRC requires that all the above building types be designed to meet the standards of the International Building Code (IBC) and its Jamaica Application Document. Implicit in this requirement is that these building types must be engineered from scratch using Registered Professionals who can apply the analytical techniques of the IBC. The document applies to the construction, alteration, movement, enlargement, replacement, repair, equipment, use and occupancy, location, removal and demolition of the building types listed above. http://www.jbs.org.jm/	28/02/08
G/TBT/N/JPN/220/Add.1	Japan - Household appliances – Addendum After the TBT notification (G/TBT/N/JPN/220) in September, the Consumer Product Safety Law (the Law) was revised and adopted in November 2007. The revision of the Law obliges manufactures and importers to confirm the following to prevent serious accidents caused by products that are difficult to be inspected and maintained by consumers without technical knowledge and deemed to have high potential risks for long-term use.	19/02/08
