CAN/177/Rev.2	02/03/09	29/04/09	Agricultural products labelled as organic	<a href="#">Canada - Agricultural products labelled as organic – Revision</a> A number of amendments were made to the OPR that address: (i) the scope of application; (ii) regulatory issues resulting from the adoption of the CGSB 310 Standard and Permitted Substances List (PSL) into the regulatory framework; (iii) the strengthening of the Agency's ability to negotiate import-export agreements with foreign governments; (iv) adjusting export requirements to allow flexibility in international trade; and (v) consumer confusion through the introduction of a single organic agricultural product legend. The proposed Regulations meet the original objectives of the OPR, including the facilitation of international market access, protection of consumers against deceptive and misleading labelling practices through a uniform approach to organic product certification and labelling, and supporting further development of the domestic market. The proposed Regulations address the issues identified above and add new provisions to preserve the organic nature and integrity of organic products.

DEU/8	30/03/09	31/05/09	Fossil fuels and biofuels are affected by the draft legislation	<a href="#">Germany - Fossil fuels and biofuels are affected by the draft legislation</a> The increased use of biofuels will be phased in at a slower pace for the following reasons: - Sustainability criteria have to be in place first to ensure a sustainable production of biomass for biofuel use. - To avoid competition with food or feedstuffs, a delay in introducing an increased biofuel quota will allow for more time to derive biomass from other sources. - For a transitional period it will not be possible to add 10% vol of ethanol to petrol because it cannot be used in engines of older cars.

G/TBT/N/*	SDD	Fecha Límite	Producto	Miembro/Proyecto
				<p>- The climate balance of second generation biofuels is much better than that of first generation biofuels, but unfortunately they are not available in sufficient quantities. Furthermore, the Federal Emission Control Act, the Energy Taxation Act and the Renewable Energies Heat Act each include an authorisation basis to enact ordinances making it possible to require compliance with sustainability criteria for recognition as biofuel. The authorisation basis included in those legislations will have to be amended to make their implementation practicable.</p>
