<a href="#">G/TBT/N/CHN/378</a>	China - Piling equipment This standard specifies the safety requirements for piling equipment. It covers piling equipment suitable for the following purposes: construction of foundations, slurry walls or base timbering structure using piles or other longitudinal elements; removal of piles; installation of drain or injection elements.	18/04/08
<a href="#">G/TBT/N/CHN/379</a>	China - Vacuum pumps This standard specifies the safety requirements for the design, installation, operation, maintenance and dismantling of various kinds of vacuum pumps.	18/04/08
<a href="#">G/TBT/N/CHN/380</a>	China - Household refrigerators This standard specifies the maximum allowable values of energy consumption, evaluating values of energy conservation, energy efficiency grades, test method and inspection rules for household refrigerators. It covers the household refrigerators driven by the electric compressor, including the refrigerators with a capacity larger than 500 litres. It does not apply to the refrigerators for special purpose such as the embedded refrigerators, the exhibition refrigerators with the transparent door or other refrigerators for special use.	18/04/08
<a href="#">G/TBT/N/CHN/381</a>	China - Fuel filling dispenser As compared with EN 13617-1:2004, the main differences are as follows: a) The titles of the standards are different; b) Unleaded petrol and ethanol petrol complying with GB17930 and GB18351 are used; c) The requirement that "classification of hazardous areas shall meet GB50516-2002" are added; d) Equipment for zone 0, 1 and 2 in this standard is corresponding to the equipment in category 1, 2 and 3 of EN13617-1:2004.	18/04/08
<a href="#">G/TBT/N/CHN/382</a>	China - Radio transmitting equipment This standard specifies the requirements for design and construction of radio transmitting equipment. The technical indexes are identically adopted IEC 60215:1987, and the following editorial changes are made: - In this standard, for normative references, where there is a Chinese standard, the Chinese standard is referenced; for those which no Chinese standard is available, an international standard is referenced; - The term "this part" is changed into "this chapter"; - The numbering of this standard is different from that of IEC 60215, please see Appendix G; - IEC Foreword is cancelled and a Chinese Foreword is added.	18/04/08

G/TBT/N/*	Miembro/Producto	SDD
<a href="#">G/TBT/N/CHN/383</a>	China - Gas-insulated, metal-enclosed switchgear for alternating current This standard specifies the requirements for gas-insulated, metal-enclosed switchgear in which the insulation is obtained, at least partly, by an insulating gas other than air at atmospheric pressure, for alternating current of rated voltages of 72.5 kV and above, and rated frequencies 50 Hz, for indoor and outdoor installation. For the purpose of this standard, the terms "GIS" and "switchgear" are used for "gas-insulated metal-enclosed switchgear". The gas-insulated metal-enclosed switchgear covered by this standard consists of individual components intended to be directly connected, and can only be operated in this manner. This standard perfects and amends, if necessary, the various relevant standards applying to the individual components constituting GIS.	18/04/08
<a href="#">G/TBT/N/CHN/384</a>	China - Transportable motor operated electric tools This standard deals with the safety of electric motor-operated or magnetically driven transportable tools.
