KOR/424	05/04/2013	04/06/2013	Electrical appliances	Republic of Korea – Electrical appliances ( <a href="#">in Korean</a> ) Draft Enforcement Rule of Electrical Appliances Safety control Act With the intension of creating a new paradigm in safety system, we plan to move from the administrative regulation oriented safety management system to a self-regulatory safety management system by requiring manufacturers or suppliers to have self-regulate and maintain responsibility and by conducting post market surveillances to monitor the markets. The 11 items including laminators and air purifiers subject to the Safety Certification are going to fall within the scope of the Self-Regulation Safety Confirmation. The 21 items including video game consoles, and studying devices using audio and/or video currently subject to the Self-Regulation Safety Confirmation will be subject to the Supplier's Declaration of Conformity. With an aim to improve the subordinate statutes by eliminating unnecessary burdens to citizens, certification grounds for multi-functioning machines have been established and the mandatory period for storing the self-inspection results has been reduced from for more than 3 years to for a period of 3 years. The products requiring safety maintenance such as solvent recovering dryers and bedside lamps are newly added to the scope of the Supplier's Declaration of Conformity.
KOR/425	05/04/2013	04/06/2013	Cotton swabs	Republic of Korea – Cotton swabs ( <a href="#">in Korean</a> ) Proposed amendment of safety criteria for a consumer product subject to the safety and quality mark The safety criteria for cotton swabs subject to the safety and quality mark has been revised as follows: The phrase of "for household use" is deleted from the scope and exclusions from application including "for medical use" and "for industrial use" are added. *According to the Safety and Quality Mark System, manufacturers or importers should indicate labeling of safety or quality if their products are subject to Safety and Quality Mark.
KOR/426	05/04/2013	04/06/2013	False eyelashes	Republic of Korea – False eyelashes ( <a href="#">in Korean</a> ) Make partial amendment to the enforcement regulations on 18 kinds of products including false eyelashes - Lower the level of safety management(safety certification, self-regulatory safety confirmation and safety and quality mark) for 14 kinds of products including false eyelashes and exclude 4 kinds of items including household tools from products subject to safety management; - Change the process for designating certification bodies and testing laboratories.

Presently, the NIP format under the Twelfth Schedule requires that the units for nutrients (other than energy, protein, fat and carbohydrate) are

G/TBT/N*	SDD	Fecha Límite	Producto	Miembro/Proyecto
				<p>to be declared in "g", and further specifies that sodium, potassium and cholesterol are to be declared in "mg". This may give the erroneous impression that the units for vitamins and minerals (as well as any other nutrient) are to be declared in "g". Some vitamins and minerals are added in microgram (mcg) quantities, while other vitamins and minerals are added in milligram (mg) quantities. In addition, there are other forms of measurements which are commonly used for certain vitamins, such as "I.U" (International Units), and the present NIP format does not reflect such forms of declaration.</p> <p>It is proposed to amend the Twelfth Schedule to specify that the nutrients are to be declared either in mcg, mg, g or other units of measurement, as appropriate. This will better address the forms of measurement currently employed by the industry.</p>
