ISR/918	23/05/2016	22/07/2016	Electrical accessories	Israel - Electrical accessories ( <a href="#">in Hebrew</a> ) Revision of the Mandatory Standard SI 61008 part 1 - Residual current operated circuit-breakers without integral overcurrent protection for household and similar uses (RCCBs): General rules (IEC) This draft standard revision adopts the International Standard IEC 61008-1 - Edition 3.2 - 2013-09, with a few changes that appear in the standard's Hebrew section. The major differences between the old version and this new revised draft standard are due to the changes introduced in the new version of the adopted standard. In addition the standard Hebrew section adds to paragraph 4.6 the following: The use of AC type circuit-breakers with sensitivity of up to 30mA is prohibited in Israel. The use of A type and AC type circuit-breakers for current higher than 30mA is allowed according to the device characterization.
ISR/919	25/05/2016	24/07/2016	Pesticide residues	Israel - Pesticide residues ( <a href="#">in Hebrew</a> ) Draft amendment "Public Health Regulations (Food) (Pesticide residues) (Amendment) 5776-2016". These regulations regulate the use of pesticides and determine the maximum residue levels (MRL's) allowed in foods according to toxicological findings and the agricultural need. The regulation undergoes amendments regularly, reflecting the changing use of pesticides in Israel. The need for updates indicates the change in the mix of materials licensed for use in food production, combined with the results of ongoing toxicological studies and newly performed risk assessments. It takes into consideration the following: new pesticides entering into use, others that are no longer in use, newly published toxicological risk assessments requiring limitations on, or even prohibition of the use of pesticides and at times, due to emerging agricultural needs, increased MRLs. This new amendment will replace the regulations' 3 annexes and will provide an amended list of pesticides MRLs. Altogether it is reassessing 45 different values.

The major changes introduced in this amendment are as follows:

Group	Pesticide	Change
Triazine	Atrazine	MRL Reduction
	Simazine	Use prohibited
	Ametrun	Use prohibited
	Prometryn	MRL Reduction
	Terbutryn	MRL Reduction
