The ordinance applies especially to petrol, diesel fuels, gas oil, biodiesel, ethanol fuel, liquid petroleum gas, natural or bio gas as fuel, vegetable oil fuel and fuel oil. The amended ordinance will specify the maximum permissible content of sulphur in marine gasoil more precisely at 1.0 gram per kilogram, compared to the current 1 gram per kilogram. The content of sulphur in marine diesel oil is specified more precisely 15.0 gram per kilogram, compared to the current 15 gram per kilogram. Gasoline with 91 octane is removed from the ordinance. The quality requirements for transport fuels are updated to the latest state of the art by citing the latest version of DIN or CEN standards in the Ordinance on the Quality and Labelling of Fuels. Quality requirements for Vegetable oil (all seeds) have been implemented in the ordinance.

KEN/419	18/06/2014	18/07/2014	Solar technologies	Kenya - Solar technologies KS 2542:2014 Off-grid Solar Photovoltaic Lighting Kits Requirements This draft standard applies to off-grid lighting appliances or kits that can be installed by a typical user without employing a technician. The kits are generally comprised of a light source (LED, CFL, or other), a rechargeable energy storage device (usually a battery), an energy generation device or source (PV module, dynamo, AC grid, unregulated DC input, or other), and internal electronics. Lighting appliances or kits with PV modules larger than 15 W (peak power under standard test conditions) are excluded from the scope of this standard. Comment to Stakeholders: The test methods in KS IEC/TS 62257-9-5 are designed for pico systems with small PV modules and batteries. For the test methods no to be too costly, the methods exclude some procedures associated with module and battery evaluation which would be appropriate to include in larger systems. The test methods are not therefore recommended for use with solar modules with peak output larger than 15 W (peak) . The process for developing test methods for use with larger systems (up to 100 peak Watts) is on-going at international level.

KOR/499	12/06/2014	11/08/2014	Electrical appliances	Republic of Korea - Electrical appliances (in Korean <a href="#">1</a> , <a href="#">2</a> , <a href="#">3</a> ) Proposed revision and withdrawal of the Korean Safety Standard With the intention of facilitating industries by reducing burdens of having two certifications, the Korean Technical Regulations under the Electrical Appliances Safety Control Act are going to adopt/refer to the Korean National Standards which are under the Industrial Standardization Act. Both of the Korean Technical Regulations (KC) and the Korean National Standards (KS) are established based on the International Standards (IEC) so that the two are almost identical. If the edition of the regulations (KC) and the corresponding standards are the same, the regulations (KC) will use the corresponding standards (KS) as reference standards. (subject to 393 regulations) - When the Electrical Appliances Safety Control Act is amended, the related regulation (KC) will be revised by adding clauses accordingly if necessary.
