G/TBT/N/*	SDD	MIEMBRO/PRODUCTO
G/TBT/N/AUS/49	31/08/06	Australia - Omnibus Rollover Strength
G/TBT/N/AUS/52	31/08/06	Australia - Engines used in heavy vehicles
G/TBT/N/JPN/182	31/08/06	Japan - Home electric appliances Amendment of the Implementation Regulations of “Tokyo Metropolitan Government Ordinance on the Environment to Secure the Health and Safety of citizens of Tokyo”. The proposed amendment would add TV receivers having LCD and PDP to the home electric appliances as covered products. Amendment of the TMG notification of the “Standards for Comparative Assessment Methods on Certain Home Electric Appliances” and “Labels which Show Energy-Saving Performance”. The proposed amendment would revise the labelling contents which show energy-saving performance etc..
G/TBT/N/THA/210	31/08/06	Thailand - Domestic refrigerating appliances The Thai Industrial Standards Institute (TISI) has proposed to revise TIS 812-2548 (2005) Motor-Compressors: Safety Requirements and to enforce as a mandatory standard. The standard deals with the safety of sealed (hermetic and semi-hermetic type) motor-compressors, their protection and control systems, if any, which are intended for use in equipment for household and similar purposes and which conform with the standards applicable to such equipment. It applies to motor-compressors tested separately, under the most severe conditions that may be expected to occur in normal use, their rated voltage being not more than 250 V for single-phase motor-compressors and 480 V for other motor-compressors.
G/TBT/N/THA/214	31/08/06	Thailand - Fluorescent lamps, Discharge lamps The Thai Industrial Standards Institute (TISI) has proposed to enforce TIS 2234-2548 (2005) Self-Ballasted Lamps for General Lighting Services: Safety Requirements as a mandatory standard. This standard specifies safety and inter-changeability requirements, together with the test methods and conditions, required to show compliance of tubular fluorescent with integrated means for controlling starting and stable operation (self-ballasted lamps), intended for domestic and similar general lighting purposes, having: a rates wattage up to 60 W; a rated voltage of 100 V to 250 V; Edison screw or bayonet. The requirements of this standard relate only to type testing. Recommendations for whole product testing or batch testing are under consideration.

La fecha límite para presentar observaciones son 30 días a partir de la fecha de esta notificación.
G/TBT/N/TPKM/31	23/08/06	The Separate Customs Territory of Taiwan, Penghu, Kinmen and Matsu - Alcohol products Alcohol products are required to label lot numbers of production starting from 20 January 2007. The lot numbers refer to specific characters, numerals or symbols that indicate the "lot" of the product, by which the record of each lot of production can be traced for audit. A "lot" number of a product refers to a specific amount of products produced by a particular production line within a specific period of time. In the case that the label of an alcohol product bears the date of packing or expiration and such date can be used to deduce the date of packaging, the date of packing or expiration can be regarded as the lot number of production.
G/TBT/N/TPKM/32	23/08/06	The Separate Customs Territory of Taiwan, Penghu, Kinmen and Matsu - Alcohol products With a view to providing consumers with information on the content of sulfur dioxide in alcohol products, it is proposed that the sulfur dioxide content in each liter of an alcohol beverage be labelled if it is over 0.25g and not exceeding 0.4g. The labelling is required to bear the following wording: "The content of sulfur dioxide in this product is below 400 ppm." Where the content of sulfur dioxide of an alcoholic beverage is below 0.25 g/L, the amount of the sulfur dioxide is not required to be labelled.

G/TBT/N/THA/204	14/08/06	Thailand - Fluorescent lamps, Discharge lamps The Thai Industrial Standards Institute (TISI) has proposed to withdraw TIS 956-2533(1990) Fluorescent lamps: Safety requirements which is a mandatory standard and replace it with TIS 956-2548(2005) Double-Capped Fluorescent: Safety Specifications). The standard specifies safety requirements for double-capped fluorescent lamps for general lighting purposes of all groups having Fa6, Fa8, G5, G13, 2G13, R17d and W4.3x8.5d caps. It also specifies the method which the manufacturer should use to show compliance with the requirements of this standard on the basis of whole production appraisal in association with his test records on finished products. This method can also be applied for certification purposes. Details of a batch test procedure which can be used to make limited assessment of batches are also given in this standard.
G/TBT/N/THA/205	14/08/06	Thailand - Fluorescent lamps, Discharge lamps The Thai Industrial Standards Institute (TISI) has proposed to enforce TIS 2235-2548 (2005) as a mandatory standard. The standard specifies safety requirements for single-capped fluorescent lamps for general lighting purposes of all groups having 2G7, 2GX7, GR8, 2G10, G10q, GR10q, GX10q, GY10q, 2G11, G23, GX23, G24, GX24 and GX32 caps. It also specifies the method which the manufacturer should use to show compliance with the requirements of this standard on the basis of whole production appraisal in association with his test records on finished products. This method can also be applied for certification purposes. Details of a batch test procedure which can be used to make limited assessment of batches are also given in this standard.
G/TBT/N/THA/206	14/08/06	Thailand - Flat steel products and semi-products The Thai Industrial Standards Institute (TISI) has proposed to enforce TIS 2223-2548 (2005) Electrolytic zinc-coated cold-rolled steel coil, strip and sheet as a mandatory standard. The standard covers electrolytic zinc-coated steel made from cold-rolled carbon steel only; specifies types, grades and symbols, basic mass, dimensions and tolerances, materials; prescribes chemical properties (i.e. coating mass, chemical treatment and symbol, oiling and symbol) and mechanical properties (i.e. yield point, tensile strength and elongation, bake hardening amount, hardness, bendability), maximum camber, out-of-square and deviation from flatness; includes marking and labelling, sampling and criteria for conformity and testing.
G/TBT/N/THA/207	14/08/06	Thailand - Flat steel products and semi-products The Thai Industrial Standards Institute (TISI) has proposed to enforce TIS 2257-2549 (2006) as a mandatory standard. The standard covers cold reduced carbon steel coil, strip and sheet of structural quality; specifies mass, dimensions and tolerances, chemical compositions (i.e. carbon, manganese, phosphorous and sulphur), and general characteristics, mechanical properties; and includes marking and labelling, sampling and criteria for conformity and testing.
G/TBT/N/THA/208	14/08/06	Thailand - Power transmission and distribution networks The Thai Industrial Standards Institute (TISI) has proposed to revise TIS 85-2517(1974) Aluminium Stranded Conductors and to enforce as a mandatory standard. The standard covers round wire concentric lay overhead electrical stranded conductors; specifies designation system, definition, stranded conductors requirements (e.g. materials, conductor sizes, surface, stranding, joints, linear density – mass per unit length, conductor strength and conductivity); and prescribes testing, packaging, marking and labelling.

G/TBT/N/*	SDD	MIEMBRO/PRODUCTO
G/TBT/N/THA/209	14/08/06	Thailand - Lamp caps and holders The Thai Industrial Standards Institute (TISI) has proposed to withdraw TIS 344-2530(1987) which is a mandatory standard and replace it with TIS 344-2549 (2006). This standard states the technical and dimensional requirements for lampholders for tubular fluorescent lamps and starterholders, and the methods of test to be used in determining the safety and the fit of lamps in lampholders and starters in starterholders; covers independent lampholders and lampholders for building-in, used with tubular fluorescent lamps provided with caps and independent starterholders and starterholders for building-in used with starters, intended for use in a.c. circuits where the working voltage does not exceed 1000 V r.m.s, and prescribes electrical rating, classification, marking, protection against electric shock, terminals, construction, resistant to dust and moisture, insulation resistance and electric strength, endurance, mechanical strength, screws, current-carrying parts and connections, creepage distance and clearance, resistance to heat, fire and tracking as well as resistance to excessive residual stresses (season cracking) and rusting.
G/TBT/N/CHE/67	11/08/06	Switzerland - Diesel passenger cars and light commercial vehicles as well as agricultural and forestry tractors. The draft ordinance stipulates that with effect from 1 March 2007 for diesel passenger cars and light commercial vehicles and from 1 January 2009 for forestry and agricultural tractors may only be imported or manufactured in Switzerland if they do not exceed the maximum particulate mass emission limit value 5mg/km and 0.025 g/kWh respectively.

G/TBT/N/HKG/26	04/08/06	- Hong Kong, China - Room air conditioners, refrigerating appliances, compact fluorescent lamps Over 40 countries, including the United States, the European Union, Australia, New Zealand, Canada and South Korea, have introduced mandatory EELS for various products. Hong Kong, China has been operating a voluntary energy efficiency labelling scheme for household and office appliances and vehicles since 1995. To achieve the objectives as set out in paragraph 7, Hong Kong, China will introduce a mandatory energy efficiency labelling scheme for room air conditioners, refrigerating appliances and compact fluorescent lamps. Local manufacturers or importers of products covered by the mandatory scheme will have to register their product models with the Electrical and Mechanical Services Department, and affix energy labels in a prescribed format onto the registered products prior to supplying them to the Hong Kong market.
G/TBT/N/MDA/1	04/08/06	- Republic of Moldova - Construction materials This draft technical regulation refers to construction materials and defines regulated fields, groups of products from regulated field subject to conformity assessment, groups of products from regulated field that are not subject to conformity assessment, essential requirements for these groups of products, procedures for conformity assessment, the presumption of conformity, criteria for conformity assessment bodies designated within this field, rules for applying the national conformity mark SM, specific rules for market surveillance.
