| G/TBT/N/CZE/114 | 29/09/06 | Czech Republic - Portable and non-portable breath alcohol analysers The Decree lays down the requirements for breath alcohol analysers, a procedure for type approval of them and a procedure for testing them. |
| G/TBT/N/CZE/115 | 29/09/06 | Czech Republic - Radar, laser and sector speed indicators The Decree lays down the requirements for automatic level gauges on fixed tanks, a procedure for type approval of them and a procedure for testing them. |
| G/TBT/N/CZE/116 | 29/09/06 | Czech Republic - Radar, laser and sector speed indicators The Decree lays down the requirements for speed indicators used to monitor observance of the road traffic rules, a procedure for type approval of them and a procedure for testing them. |
| G/TBT/N/ECU/14 | 29/09/06 | Ecuador - Láminas onduladas de asbesto cemento Este proyecto de reglamento establece los requisitos que deben cumplir las láminas onduladas de asbesto cemento, con el propósito de prevenir riesgos para la salud, la vida, la seguridad, el medio ambiente y las prácticas que puedan inducir a error a los usuarios en su manejo, operación y funcionamiento. |
| G/TBT/N/ECU/15 | 29/09/06 | Ecuador - Fósforos Este proyecto de reglamento establece los requisitos que deben cumplir los fósforos destinados al consumo, con el propósito de prevenir riesgos para la salud, la vida, la seguridad, el medio ambiente y el empleo de prácticas que puedan inducir a error a los usuarios en su manejo y utilización. |
| G/TBT/N/PNG/1 | 29/09/06 | Papua New Guinea - All Food Products The Draft Regulation lays down the requirements for food inspectors and analysts, food and food additives, packaging and labelling, food testing laboratories and inspection bodies, food premises and licence fees. The Draft Regulation also contain schedules for maximum microbial loads permitted, permitted additives, prescribed animal diseases, standard acceptable for statement of ingredients and component of imported food, alcohol drinks and classification systems for food business. |
| G/TBT/N/TPKM/35 | 29/09/06 | The Separate Customs Territory of Taiwan, Penghu, Kinmen and Matsu - Electric shredder and other digital audio recording apparatus The Separate Customs Territory of Taiwan, Kinmen and Matsu intends to regulate electric shredder and other digital audio recording as commodities subject to inspection. As of 1 July 2007, all such products must be inspected by the Bureau of Standards, Metrology and Inspection, and must conform to the safety and EMC inspection requirements (except that the digital cameras and digital video cameras are required to comply with EMC requirements only) when imported or marketed. All the technical requirements for the aforementioned products are CNS standards that have been harmonized with relevant IEC or CISPR standards. This notice also provides the applicable conformity assessment procedures. The digital cameras and digital video cameras will be subject to Declaration of Conformity scheme, while others will be subject to a dual-track approach to conformity assessment procedures, namely Registration of Product Certification or Type-approved Batch Inspection. |
| G/TBT/N/TPKM/36 | 29/09/06 | The Separate Customs Territory of Taiwan, Penghu, Kinmen and Matsu - Shoes In response to requests from consumers for further information on shoes, the Department of Commerce require the following information be labelled on shoes: (1) Name of the commodity, (2) Name, telephone number, and address of the manufacturer, or of the importer if applicable, (3) Country of region, (4) Main materials of vamps and soles and (5) Size. |

| G/TBT/N/KEN/68 | 22/09/06 | Kenya - Carbon Black used in rubber products The notice amends the Petroleum Rules (The Petroleum Act Cap. 116) Part V by inserting rule No. 73. The new rule states that no LPG cylinders shall be manufactured or imported into Kenya other than those of capacities, and fitted with the unified valves as specified in this legal notice. |
| G/TBT/N/PHL/63 | 22/09/06 | Philippines - Ceramic wall and floor tiles This notification mandatorily requires that all manufacturers, distributors, importers and retailers of ceramic wall and floor tiles shall comply with the requirements of PNS 154:2005. |
| G/TBT/N/PHL/64 | 22/09/06 | Philippines - Flat Glass This notification mandatorily requires that all manufacturers, distributors, importers and retailers of flat glass shall comply with the requirements PNS 130:2004. |
| G/TBT/N/SLV/95 | 22/09/06 | El Salvador - Productos Lácteos Esta norma comprende, objeto, campo de aplicación, definiciones, composición esencial y factores de calidad, aditivos alimentarios, clasificación del producto, características generales, físico químicas y microbiológicas, contaminantes, toma de muestras, muestreo, métodos de ensayo y análisis, higiene, envase y etiquetado, almacenamiento y transporte, apéndice normativo, vigilancia y verificación. |
| G/TBT/N/SLV/96 | 22/09/06 | El Salvador - Pupusas crudas y precocidas congeladas Esta norma comprende, objeto, campo de aplicación, definiciones, clasificación y designación, requisitos, condiciones sanitarias, muestreo, métodos de ensayo y análisis, envase y etiquetado, almacenamiento y transporte, vigilancia y verificación, apéndice. |
| G/TBT/N/SLV/97 | 22/09/06 | El Salvador - Barras de acero lisas y corrugadas para refuerzo del concreto Esta norma comprende, objeto, campo de aplicación, definiciones, información de un pedido, material y fabricación, composición química, requisitos de las corrugas, medidas de las corrugas, requerimientos de tensión, requerimientos del doblado, variación de peso (masa) permitida, acabado, número de ensayo, reensayo, muestras para el ensayo, reporte de los ensayos, inspección, rechazo, revisión, marcado, empaçado y apéndice. |
| G/TBT/N/USA/205/Add.1 | 22/09/06 | United States - Alcohol beverages - Addendum |
| G/TBT/N/CHN/224 | 19/09/06 | China - Digital television terrestrial broadcasting system This standard mainly specifies the framing structure, channel coding and modulation for digital television terrestrial broadcasting with frequency range of UHF and VHF. This standard applies to digital television terrestrial broadcasting system. |
| G/TBT/N/CHN/225 | 19/09/06 | China - Simple pressure vessels This technical regulation lays down mandatory safety technical requirements for simple pressure vessels, which is composed of a cylindrical part of circular cross-section closed by outwardly dished and/or flat ends revolving around the same axis as the cylindrical part or two dished ends revolving around the same axis. The design pressure of the simple pressure vessels is less than 1.6MPa and the product of pressure and volume is less than 1000MPa·L. The simple pressure vessels contain air, nitrogen and vapour from medical distilled water, and with the design temperature not less than -20° and maximum working temperature not exceed of 150°. Carbon steel or austenitic stainless steel is used as the material of the simple pressure vessels. The purpose of this regulation is to ensure the safety of simple pressure vessels. |

| G/TBT/N/KEN/56 | 15/09/06 | Kenya - Carbon Black used in rubber products This Part of KS 2053 prescribes the requirements and test methods for Intermediate Super Abrasion Furnace Carbon Black, N219 grade used in rubber products. |
| G/TBT/N/KEN/57 | 15/09/06 | Kenya - Carbon Black used in rubber products This Part of KS 2053 prescribes the requirements and test methods for Intermediate Super Abrasion Furnace Carbon Black, N220 grade used in rubber products. |
| G/TBT/N/KEN/58 | 15/09/06 | Kenya - Carbon Black used in rubber products This Part of KS 2053 prescribes the requirements and test methods for Intermediate Super Abrasion Furnace (ISAF) Carbon Black, N231 grade used in rubber products. |
| G/TBT/N/KEN/59 | 15/09/06 | Kenya - Carbon Black used in rubber products This Part of KS 2053 prescribes the requirements and test methods for High Abrasion Furnace Carbon Black, N330 grade used in rubber products. |
| G/TBT/N/KEN/60 | 15/09/06 | Kenya - Carbon Black used in rubber products This Part of KS 2053 prescribes the requirements and test methods for Fast Extrusion Furnace Carbon Black, N550 grade used in rubber products. |
| G/TBT/N/KEN/61 | 15/09/06 | Kenya - Carbon Black used in rubber products This Part of KS 2053 prescribes the requirements and test methods for Fast Extrusion Furnace Carbon Black, N550 grade used in rubber products. |
| G/TBT/N/KEN/62 | 15/09/06 | Kenya - Hair shampoo The standard prescribes the requirements and methods of test for hair shampoo, soap-based. In this third edition, new requirements have been included to cater for products containing herbal additives e.g. Neem extracts. |
| G/TBT/N/KEN/63 | 15/09/06 | Kenya - Hair shampoo This Kenya Standard prescribes the requirements and methods of test for hair shampoo, synthetic detergent-based. The standard was first issued in 1986. In the Second Edition, requirements for volatile matter and inorganic salts were deleted, as they do not serve any meaningful purpose. Matter insoluble in alcohol was prescribed as 2 %. An additional requirement for lather was included, which is important from the consumer's satisfaction point of view. Many of the surfactants, which are frequently used in shampoos as cleansing agents, develop abundance lacy foam in soft water but this lather drops drastically in presence of oily soils. Therefore, ingredients commonly known as foam boosters are added in shampoos to improve quality, volume and characteristics of lathers. Minimum lather volume for 1 % solution has been specified to quantify this requirement. Table 2 has also been inserted under requirements to cater for baby shampoos, which are mild in nature, and Table 3 has been inserted to cater for neutralizing shampoos. |
| G/TBT/N/KEN/64 | 15/09/06 | Kenya - Hair creams This Kenya Standard prescribes the requirements and methods of test for hair creams, lotions and gels. The standard was first issued in 1988. In the second edition, the scope of the standard was expanded to cover hair lotions and gels in addition to hair creams. The labelling requirements have been altered. The Total Plate Count (TPC) of micro-organisms has also been reduced to 100 per gram maximum. The requirement for heavy metals has also been expanded to cover arsenic and mercury in addition to lead. The other requirements remain unaltered. In this third edition, some new requirements have been put in place to cater for herbal additives e.g. Neem extracts. |

| G/TBT/N/* | SDD | MIEMBRO/PRODUCTO |
|---------------------------------|----------|--|
| G/TBT/N/KEN/65 | 15/09/06 | Kenya - Hair creams This Kenya Standard prescribes the requirements and methods of test for hair creams, lotions and gels. The standard was first issued in 1988. In the second edition, the scope of the standard was expanded to cover hair lotions and gels in addition to hair creams. The labelling requirements have been altered. The Total Plate Count (TPC) of micro-organisms has also been reduced to 100 per gram maximum. The requirement for heavy metals has also been expanded to cover arsenic and mercury in addition to lead. The other requirements remain unaltered. In this third edition, some new requirements have been put in place to cater for herbal additives e.g. Neem extracts. |
| G/TBT/N/KEN/66 | 15/09/06 | Kenya - Bath preparations This Part 1 of KS 1767 prescribes the requirements and methods of test for foam baths and shower gels. The standard covers synthetic detergent-based foam baths (also referred to as cream baths), shower gels (also referred to as body wash, cream wash, cream shower, bath shower, and shower shampoo), and other such related products. |
| G/TBT/N/KEN/67 | 15/09/06 | Kenya - Liquid polyaluminium chloride This guidelines is applicable to the installation requirements, work procedures and the scope of work relevant to its usage, labelling - transportation - storage, safety requirements and emergency procedures involved when using polyaluminium chloride (PAC) in aqueous (liquid) form in water supply service. |
| G/TBT/N/MDA/6 | 15/09/06 | Moldova - Electrical equipment The technical regulation refers to electrical equipment placed on the domestic market, with a voltage rating between 50 and 1000 V for alternating current and between 75 and 1500 V for direct current. It includes essential safety requirements, market placement rules, conformity assessment procedures, standards laid down by international bodies. |
| G/TBT/N/NOR/9 | 15/09/06 | Norway - Tattooing product The draft regulations encompass all situations associated with developing, producing, importing, processing, distributing, exporting and selling tattooing products and Norwegian health personnel's duty to report any side effects when using such products. |
| G/TBT/N/NOR/10 | 15/09/06 | Norway - Products for cutaneous injection for cosmetic purposes The draft regulations encompass all situations associated with developing, producing, importing, processing, distributing, exporting and selling of products for cutaneous injection for cosmetic purposes and Norwegian health personnel's duty to report any side effects when using such products. |
| G/TBT/N/NOR/11 | 15/09/06 | Norway - External healthcare products The draft Regulations encompass all situations associated with developing, producing, importing, processing, distributing, exporting and selling external healthcare products and Norwegian health personnel's duty to report any side effects when using such products. |
| G/TBT/N/NOR/12 | 15/09/06 | Norway - Product for external use for care and marking of animals using chemical means The draft regulations encompass all situations associated with developing, producing, importing, processing, distributing, exporting and selling of products for external use for care and marking using chemical means of animals and animal health care personnel's duty to report any side effects when using such products. Products meant for use in the eyes or which are consumed orally are not included. Products which are fixed items are not included. |

| G/TBT/N/KOR/116 | 05/09/06 | <p>Republic of Korea - Industrial products</p> <p>The following amendments will be made in quality management and safety control of industrial products. There are amendments on enforcement ordinances and enforcement regulations. Each amendment is as follows:</p> <p>Enforcement ordinance of amendments (proposed) on Quality management and safety control of industrial products act</p> <p>1. Rules to prohibit or limit hazardous chemicals and endocrine disruptors from child products</p> <p>2. Safety inspection on non-regulated products.</p> <p>Set report procedures of harmful products to prevent consumers from danger of life or injury.</p> <p>Set report procedures of recall recommendations and public notice to reduce consumers' damage by preventing delivery of hazard products.</p> <p>Enforcement regulation amendments (proposed) on quality management and safety control of industrial products act</p> <p>1. Designation of regulated products as safety certification and their conformity assessment procedures.</p> <ul style="list-style-type: none"> - Designate 18 items such as pressure cookers, safety helmets for vehicles and baby carriages which cause significant concern of consumers' life and injury - Designate safety certification bodies and establish rules for procedures of safety certification and market surveillance. - Set the regulations of scope and procedures over mutual arrangement between safety certification bodies <p>2. Designation of regulated products as 'Supplier's Declaration of Conformity' and their conformity assessment procedures</p> <ul style="list-style-type: none"> - Designate 48 items as 'Supplier's Declaration of Conformity' such as toys and life-saving jackets, etc. - Implement the rules for procedures of 'Supplier's Declaration of Conformity' and market surveillance. <p>3. Designation of regulated products as labeling and their conformity assessment procedures</p> <ul style="list-style-type: none"> - Designate 13 items such as tents and dehumidifiers, etc. - Set the regulations of how and when to define industrial products for safety & quality labeling <p>4. Designation of regulated products for child-resistance packaging and their labeling procedures</p> <ul style="list-style-type: none"> - Set the regulations of report procedures and quality label for industrial products for child-resistance packaging, such as detergents and glue removers, etc. |

| G/TBT/N/CHN/214 | 04/09/06 | <p>China - Jet fuel</p> <p>This standard defines the requirements, test methods, inspection rule, mark, packaging, transportation, storage and inspection upon delivery of No.3 Jet fuel manufactured from crude oil or oil distillate. The product covered by this standard is intended for use in aircraft gas turbine engines.</p> |
| G/TBT/N/CHN/215 | 04/09/06 | <p>China - Non-ferrous metal ores and concentrates products</p> <p>This National Standard specifies the limitation concentration of natural radioactivity of non-ferrous metal ores and concentrates products. It applies to non-ferrous metal ores and concentrates products marketed within the territories of the People's Republic of China. The limitation concentration of natural radioactivity shall be conformed with the following requirements.</p> <p>a. Activity concentration of natural radioactivity</p> <p>The limit activity concentration of natural radioactivity in non-ferrous metal ores and concentrates products should be determined as follows:</p> <p>All C_{matural} of a decay chains of 238U? 226Ra?232Th=1Bq/g; C_{matural} of 40K=10Bq/g</p> <p>b. Screening level</p> <p>The screening level of gamma-radiation dose rate(contains natural environment background radiation) in non-ferrous metal ores and concentrates products should be determined as 400nGy/h, while the samples(diameter=2m,thickness=1m) were measured, the distance of measurement is about 0.1m from the sample surface.</p> <p>c. Pollution of artificial radionuclide</p> <p>It will forbid that the non-ferrous metal ores and concentrates products are being polluted by artificial radionuclide or carried artificial materials/ radiation sources.</p> |
| G/TBT/N/CHN/216 | 04/09/06 | <p>China - Domestic gas instantaneous water heater and gas fired heating and hot water combi-boiler</p> <p>This standard specifies the minimum allowable values of energy efficiency, evaluating values of energy conservation, energy efficiency grades, test methods and inspection rules of domestic gas instantaneous water heater and gas fired heating and hot water combi-boilers. This criteria applies to gas water heater and boilers with rated heat input less than or equal to 70kW. Gas storage water heater are not included in the scope of this standard.</p> |
| G/TBT/N/CHN/217 | 04/09/06 | <p>China - Small and medium three-phase asynchronous motors</p> <p>This standard specifies the minimum allowable values of energy efficiency, evaluating values of energy conservation, target values of energy efficiency, energy efficiency grades and test methods of small and medium three-phase asynchronous motors.</p> <p>This standard applies to general employment motors or general employment explosion protection motors with 690V and lower voltage, 50Hz three-phase alternating current power supply, the scope of grade 2 and grade 3 efficiency rating power between 0.55kW to 315kW, the scope of grade 1 efficiency rating power between 3kW to 315kW, the numbers of poles are 2, 4 and 6, single-speed close fan-cooled and N design.</p> |
| G/TBT/N/CHN/218 | 04/09/06 | <p>China - Foam extinguish agent</p> <p>This standard specifies the performance requirement, test method and inspection rule of foam extinguish agent.</p> |
| G/TBT/N/CHN/219 | 04/09/06 | <p>China - Fused Deposition Modeling Machine</p> <p>This standard applies to fused deposition modelling machines (FDM). The safety requirements and safety measures of these machines are specified as follows:</p> <p>1 Mechanical hazard and safeguarding</p> <p>1.1 There isn't any cusped edge, sharp corner, sharp edge and so on that may hurt people on the reachable places on machine.</p> <p>1.2 On normal working condition, the machine tool or other parts should not accidentally turnover.</p> <p>1.3 The dependable limit measure should be taken on machine tool's advance and return parts. Dependable mechanical limit devices should be installed on each moving axis.</p> <p>1.4 The interlocked shield should be equipped in the working area of machine tool.</p> <p>As for those machine tools with enclosed construction working area, the door of</p> |

| G/TBT/N/* | SDD | MIEMBRO/PRODUCTO |
|---------------------------------|----------|--|
| | | <p>forming room should be interlocked.</p> <p>1.5 When the interlocked protection devices are opened, the machine tool should stop or cannot be started up, and it cannot be started up before the protection devices are closed. For example, when the door of the forming room is open, the machine tool cannot run.</p> <p>1.6 The nozzle's holding device should be safe and dependable so as to make sure the nozzle won't fall or be thrown off while moving at high speed.</p> <p>1.7 In some dangerous area, multiple and different safety protection devices should be used to avoid invalidation due to the same cause.</p> <p>2 Safety and safeguarding devices</p> <p>Removable safeguarding device should be mounted and removed easily.</p> <p>3 Control system and devices</p> <p>3.1 No hazard should be occurred if control signal breaks off.</p> <p>3.2 Parts of control system which is easy to be mis-operated should be designed mistake-allowed.</p> <p>3.3 Emergency stop device should be mounted at each working station.</p> <p>4 Electrical hazards and protection</p> <p>4.1 The protection degree provided by electric enclosure should be in accordance with 12.3 of GB 5226.1-2002.</p> <p>4.2 The machine tool ought to be earthed dependably. The grounded insulated resistance should be not less than 1 MO and meet with the continuity requirement of protection circuit.</p> <p>4.3 The electric device (including components) in the forming room of machine tool should be equipped with heat resistant electric product. (see section 4.4.3 in GB 5226.1-2002).</p> <p>4.4 The other safety requirement of machine tools should conform to the provision in chapter 4~19 of GB 5226.1-2002.</p> <p>5 The protection of high temperature</p> <p>5.1 Dependable temperature controlling device which can adjust the nozzle's temperature automatically should be introduced on the nozzle heating system, and heat insulation measure should be taken on the nozzle and the exterior of the nozzle's heating system.</p> <p>5.2 Dependable temperature controlling device should be used on the machine tool which forming room need to be heated. This device is applicable for controlling the heater and preventing the temperature from being too high.</p> <p>5.3 The door of the forming room should conditionally interlock with the heating system of the nozzle and the door cannot be open while the nozzle is being heated or the process is going on.</p> <p>6 Baneful gas protection</p> <p>6.1 The design of machine tool should conform to the principles established in GB/T 18569.1-2001. Takes into account the hazard to health caused by nocuous substance emission and takes measures for preventing risks and protecting health.</p> <p>6.2 The test method of harmful substance concentration should conform with the provisions of GB/T 18569.2-2001.</p> <p>7 Noise</p> <p>8 Lighting.</p> |
| G/TBT/N/CHN/220 | 04/09/06 | <p>China - Video Surveillance Systems</p> <p>This standard specifies the technical requirements and test methods for Digital Video Record Equipment of Video Surveillance System in Security & Protection Systems. The standard is the basis for design, production and acceptance of these Systems.</p> |
| G/TBT/N/CHN/221 | 04/09/06 | <p>China - Motor Vehicles</p> <p>This standard modifies adopt IEC 60839-10-1:1995 Alarm systems Part 10: Alarm systems for road vehicles- Section 1: Passenger cars. It specifies the technical requirements and test methods for VSAS. The standard is the basis for design, production and acceptance of VSAS.</p> |
| G/TBT/N/CHN/222 | 04/09/06 | <p>China - Waste Paper</p> <p>Clauses 4.4 and 4.5 of this standard are compulsory which specify: in Clause 4.4, there should be no noxious or harmful materials in all kinds of waste paper. In Clause 4.5, in all kinds of waste paper, the contents of forbidden materials should accord with the requirements in Table 1.</p> |

| G/TBT/N/CHE/75 | 01/09/06 | Switzerland - Alcoholic beverages - Adaptation of the Swiss legislation including its terminology to the EC legislation. - New regulations concerning the declaration of sweet alcoholic beverages. - New regulations for the composition and minimum alcoholic content of spirituous beverages. |
| G/TBT/N/THA/211 | 01/09/06 | Thailand - Fluorescent lamps, Discharge lamps The Thai Industrial Standards Institute (TISI) has proposed to enforce TIS 2309-2549 (2006) Double-Capped Fluorescent Lamps: Energy Efficiency Requirements as a mandatory standard. This standard specifies Minimum Energy Performance Standard (MEPS) requirements for double-capped tubular fluorescent lamps with a nominal length of 550 mm to 1500 mm and having nominal lamp wattage of 16 watts or more. The standard further specifies efficiency requirements as follows: * Initial efficiency (F100) * Maintained efficiency (FM) * General colour rendering index requirements (Ra) This standard covers lamps for general illumination purposes, for use in luminaries and with lamp ballasts connected to a 220 V 50 Hz single phase or similar mains supply; includes that are intended for use only with high frequency (electronic) ballasts. |
| G/TBT/N/THA/212 | 01/09/06 | Thailand - Fluorescent lamps, Discharge lamps The Thai Industrial Standards Institute (TISI) has proposed to enforce TIS 2310-2549 (2006) Self-Ballasted Lamps for General Lighting Services: Energy Efficiency Requirements as a mandatory standard. This standard covers Minimum Energy Performance Standard (MEPS) requirements for self-ballasted lamps for general lighting services, with rated wattage not exceeding 60 watts and having rated voltage of 220 V to 230 V 50 Hz. This standard covers self-ballasted lamps for general lighting services, for domestic use and similar general lighting purposes. |
| G/TBT/N/THA/213 | 01/09/06 | Thailand - Fibres and cables The Thai Industrial Standards Institute (TISI) has proposed to revise TIS 2167-2547 (2004) Optical Fibre cables - Part 3-30: Outdoor Cables-Family Specification for Optical Telecommunication Cables for Lake and River Crossing and enforce as a mandatory standard. The standard covers optical telecommunication cables to be used for lake and river crossings, requirements for optical telecommunication cables for duct, buried, aerial and lake and river crossing. This standard does not cover methods of cable repair nor repair capability, nor does it cover cables for use with lake and river crossing line amplifiers. The number of fibres tested is representative of the cable design and should be agreed between the user and the manufacturer. |
