These are the major requirements introduced in the regulations: <ul style="list-style-type: none"> - Requires to register novel foods (regulations 2 and 4 through 6); - Prohibits the manufacture, import , store or sale of a novel food unless it is registered in the official list of permitted novel foods (regulations 3); - Requires labeling genetically modified pre-packaged food, fruits and vegetables (regulations 10 through 12).
ISR/709	23/10/2013	22/12/2013	Cosmetics	Israel – Cosmetics (in Hebrew) Pharmacists' Regulations (Cosmetics) 5773-2013 New draft regulations announced by Israel's Ministry of Health called " <i>Pharmacists' Regulations (Cosmetics)</i> ". This draft regulation fully adopts the European model for marketing of cosmetics outlined in " <i>Regulation (EC) No. 1223/2009 of The European Parliament and of The Council of 30 November 2009 on Cosmetic Products</i> ", which according to professionals provides the best basis for controlling the marketing of cosmetics, the lowering of trade barriers and safeguarding of consumers. The new regulations are significantly different from the way cosmetics had been controlled and supervised in Israel in the past. It does away with the supplier's need to obtain a registration certificate and requires only a notification 10 days prior to marketing. According to this change, the major responsibilities of the Ministry of Health will shift to formulation of the rules and regulations for cosmetic marketing in Israel and determination of the bodies and mechanisms authorized to manufacture and market cosmetics. All these will be accompanied by a strict market surveillance system. These are the major requirements introduced in the regulations: <ul style="list-style-type: none"> - No person shall import into Israel a cosmetic unless the product has been granted a Certificate of Free Sale by a recognized country; - In order to establish clear responsibilities, each cosmetic product should be linked to a responsible person who will be the legal entity responsible for the product and for the regulatory procedures governing it (Regulation 5); - In order to ensure their safety, cosmetic products placed on the market should be produced according to Good Manufacturing Practice (GMP) and distributors shall ensure that storage and transport conditions do not jeopardize their compliance with the requirements set out in these Regulations (Regulations 8 and 11); - Requires a safety assessment from a suitable professional that will cover all safety aspects of the cosmetic product, including its ingredients, side effects and required warnings (Regulation 12 and Annex 3); - For the purpose of effective market surveillance, a product information file should be made readily accessible to the competent authority and should include information and data about the product, its safety assessment, manufacturing procedures, tests, claims against it, if served, and data on any animal testing performed (Regulation 13); - Prior to placing the cosmetic product on the market, the responsible person shall provide the Ministry of Health electronically the general information required for the basic control by the Director General of the Ministry of Health or his representative (Regulation 14);

The qualification of argon gas filled test specimens is based on the qualifications in 1.3 and maintaining the specified argon gas amounts before and after testing to Test Method E2188. Qualification under this specification is intended to provide a basis for evaluating the durability of sealed insulating glass units.
PHL/175	24/10/2013	13/12/2013	Masonry cement	Philippines - Masonry cement Draft Philippine National Standard (DPNS/ASTM C91:2013) - Masonry cement - Specification This notification is a revision to PNS ASTM C91:2005 - Specification for Masonry Cement, since the standard reference used in this standard has been revised twice in ASTM. Amendment 01:2013 is the same Amendment adopted in PNS ASTM C91:2005 that pertains to the marking and labelling requirement. Therefore, upon adoption and approval of ASTM C91-2012 only the ASTM standard is revised and the Amendment 01:2005 is updated to Amendment 01:2013.

PHL/174	01/10/2013	25/11/2013	Plásticos compostables	<p>Filipinas - Plásticos compostables Proyecto de Norma Nacional de Filipinas 2103:20xx -Especificaciones de los plásticos compostables. Se especifican procedimientos y requisitos para la clasificación y etiquetado de los plásticos y sus productos que se pueden reciclar mediante compostaje aeróbico. Se abordan las siguientes cuestiones:</p> <ul style="list-style-type: none"> - Biodegradación; - Descomposición durante el compostaje; - Efectos negativos en el proceso y las instalaciones de compostaje; - Efectos negativos en la calidad del compost, por ejemplo la presencia de metales regulados y otros componentes nocivos en fuerte concentración. <p>El objetivo es establecer las prescripciones para el etiquetado de productos y materiales plásticos, incluidos los envases, para los que se afirma que son "compostables" o "compostables en instalaciones de compostaje municipales e industriales" o "biodegradables durante el compostaje" (en la norma internacional notificada, estas tres expresiones se consideran equivalentes). Además, la etiqueta deberá cumplir el reglamento nacional pertinente (por ejemplo, las Leyes de la República N°. 6969 y 7394).</p>
