Food and Drugs

[Food and Drug Regulations — Amendments](#)

Interim Marketing Authorization. Health Canada has received submissions to permit the use of ascorbic acid as a preservative in canned pears, canned pineapple, canned apples, canned potatoes and canned salsifies at levels consistent with good manufacturing practice. Evaluation of available data supports the safety and effectiveness of ascorbic acid as a preservative in the production of these food products.

[Food and Drug Regulations — Amendments](#)

Interim Marketing Authorization. Health Canada has received a submission to permit the use of citric acid as a pH adjusting agent in pickled beets at a level of use consistent with good manufacturing practice. Evaluation of available data supports the safety and effectiveness of citric acid as a pH adjusting agent in the production of pickled beets.

Notices and Proposed Regulation

[Interim Marketing Authorization regarding the use of disodium EDTA in edible coatings for sausages](#)

it is the intention of Health Canada to recommend that the Food and Drug Regulations be amended to permit the use of disodium EDTA as a sequestering agent in the production of edible coatings for fresh, pre-cooked or other form of sausages, at a maximum level of use of 80 ppm in the coated sausage.

[Interim Marketing Authorization regarding the use of talc as a coating agent in split peas, soybeans and fava beans](#)

it is the intention of Health Canada to recommend that the Food and Drug Regulations be amended to permit the use of talc as a coating agent in the production of dried split peas, soybeans and fava beans at levels consistent with good manufacturing practice.

safety and effectiveness of disodium EDTA as a sequestering agent in the production of this food product.
<http://canadagazette.gc.ca/partI/2008/20080927/html/notice-e.html#d102>

Amendments - Health Canada has received a submission to permit the use of a blend of allura red, brilliant blue FCF, sunset yellow FCF and tartrazine as colouring agents in lumpfish caviar at a level of 800 ppm. The maximum level of use for allura red, sunset yellow FCF and tartrazine, singly or in combination, would be 550 ppm and the maximum level of use for brilliant blue FCF would be 300 ppm. Evaluation of available data supports the safety and effectiveness of allura red, brilliant blue FCF, sunset yellow FCF and tartrazine as colouring agents in the production of lumpfish caviar.

Environment

Order Adding Toxic Substances to Schedule 1 to the Canadian Environmental Protection Act, 1999
propose the addition of chlorinated paraffins to the List of Toxic Substances in Schedule 1 of the Act. These substances were found to be toxic as set out in section 64 of CEPA 1999.
<http://canadagazette.gc.ca/partI/2008/20080920/html/regle2-e.html#k107>

Environment - Health: Regulations Adding Perfluorooctane Sulfonate and Its Salts to the Virtual Elimination List
The Ministers of Environment and of Health are required by the Act to propose the addition of PFOS and its salts to the Virtual Elimination List of CEPA 1999. No other alternative is acceptable under the Act.
<http://canadagazette.gc.ca/partI/2008/20080906/html/regle1-e.html#k101>

Order Adding Toxic Substances to Schedule 1 to the Canadian Environmental Protection Act, 1999
The objective of the proposed Order Adding Toxic Substances to Schedule 1 to the Canadian Environmental Protection Act, 1999 made pursuant to subsection 90(1) of CEPA 1999, is to add the following substances:
Propanedinitrile, [[4-[[2-(4-cyclohexylphenoxy)ethyl]ethylamino]-2-methylphenyl]methylene]- (CAS No. 54079-53-7);
Methyloxirane (CAS No. 75-56-9); Ethyloxirane (CAS No. 106-88-7); Naphthalene (CAS No. 91-20-3); Toluene diisocyanates (three substances: CAS No. 26471-62-5, 584-84-9 and 91-08-7); 1,2-Benzenediol (CAS No. 120-80-9); and 1,4-Benzenediol (CAS No. 123-31-9).

Motor Vehicle Safety

Regulations Amending the Motor Vehicle Safety Regulations (Head Restraints)
This proposed amendment to standard 202 (Head Restraints) of Schedule IV of the Motor Vehicle Safety Regulations (MVSr), hereafter referred to as the Canadian safety standard, would update the requirements for head restraints of passenger cars and three-wheeled vehicles and every truck, bus or multi-purpose passenger vehicle with a gross vehicle weight rating of 4 536 kg or less. This proposed amendment would provide vehicle occupants improved protection from neck injuries in the event of a collision

Motor Vehicle Safety Regulations (Low-speed Vehicles) - Amending SOR/2008-229

This amendment to the Motor Vehicle Safety Regulations (MVSr) updates the requirements for the Low-speed Vehicles (LSV) class by: introducing requirements for a slow-moving vehicle emblem to be permanently marked on LSV; clarifying the original reason for establishing the LSV class, which was to allow the use of such vehicles for short trips such as shopping, social and recreational purposes, in limited, planned and controlled environments; introducing new wording that, for the first time, allows small trucks to be classified as LSV; including a maximum limit for the mass of LSV to ensure that large trucks and passenger vehicles cannot be improperly classified as LSV; and, introducing a requirement that the propulsion systems of LSV must be designed for their top speed of 40 km/h. <http://canadagazette.gc.ca/partII/2008/20080806/html/sor229-e.html>

Seeds Regulations —Amending SOR/2008-228

The Government of Canada, on the recommendation of the Canadian Food Inspection Agency (CFIA), is therefore removing the KVD-related restrictions in the Regulations on wheat seed imported into the CWB Area in western Canada. This regulatory amendment is consistent with Canada's international trade obligations by removing KVD requirements for imported wheat seed that have already been removed for wheat seed of national origin

Regulations Amending the Energy Efficiency Regulations

The proposed amendment

NRCan expects the Regulations Amending the Energy Efficiency Regulations ("the proposed amendment") to increase the stringency of existing MEPS for currently regulated products; introduce new MEPS and associated reporting and compliance requirements for six products (see below); introduce MEPS for general service lamps; and require consumer energy performance labelling for general service lamps, general service incandescent reflector lamps and compact fluorescent lamps (CFLs).

Food and Drugs

Food and Drugs Regulations — Amendment

It is the intention of Health Canada to recommend that the Food and Drug Regulations be amended to permit the use of amylase derived from *Aspergillus oryzae* var. in the production of infant cereals at levels consistent with good manufacturing practice.

Health

Regulations Amending the Consumer Chemicals and Containers Regulations, 2001

The technical updates, each of which are discussed in Appendix A of this statement, are LC50 criteria for gases and vapours—change in units of measurement,

Hydrocyanic acid or its salts—correcting the English version of the table to subsection 34(1) to reflect the French version,

Fuel containers—clarification of exception,

Very flammable fuels—removal of improper reference,

Spray containers that have a flashback—clarification of exception,

Toxic product labelling—update of first-aid information,

Corrosive product labelling—update of safety information,

Referenced standards—update of outdated standards,

Toxic substances of special concern—clarification of requirements, and

Flame projection test—simplification of test method.

The proposed updates to the CCCR, 2001 will facilitate compliance and enforcement, as the existing requirements will be detailed in a more precise manner. This will allow industry to better understand and comply with the Regulations.

Industry

Electricity and Gas Inspection

Regulations Amending the Electricity and Gas Inspection Regulations

These amendments will have a minimal impact on commercial transactions in Canada. Some amendments are of an administrative nature, some clarify the intention of the Regulations and others relax the existing requirements to reflect current practices. The amendments contribute to the achievement of Measurement Canada's (MC) mandate to ensure the integrity and accuracy of trade measurement in Canada.

Personal Information Protection and Electronic Documents

Regulations Amending the Regulations Specifying Investigative Bodies

Part 1 of the Personal Information Protection and Electronic Documents Act (PIPEDA) establishes rules to govern the collection, use and disclosure of personal information by organizations in the course of commercial activity. The legislation requires an organization which is disclosing personal information to obtain the individual's consent in most circumstances. An exception to this rule is found in paragraphs 7(3)(d) and (h.2) of the Act, which permit the disclosure of personal information to and by a private investigative body, without the knowledge or consent of the individual, if the investigative body is specified by the investigative bodies regulation. The purpose of this amendment to the investigative bodies regulation is to name additional investigative bodies for the purposes of paragraph 7(3)(d) or (h.2) of the Act.

Food and Drugs

Meat Cut Manual The Uniform Meat Cut Nomenclature System (UMCNS) is designed to provide industry and consumers with a simple and informative system of nomenclature which will ensure the use of standardized terms in the naming of meat cuts, discourage any misuse of these terms and provide consumers with information which they require in making price comparisons and in selecting cooking methods. The definitions enclosed in the manual establish limits within which these cut names may be used.

Notice of Intent — Food and Drug Regulations — Project No. 1554 — Schedule F

The proposed change would require two amendments to Schedule F:

progesterone would be added to Part I of Schedule F, as Progesterone and its derivatives except when sold in an implant for veterinary use for growth promotion; and

progesterone would be removed from Part II of Schedule F by listing it as an exception under the group listing for sex hormones.
