[Order Adding Toxic Substances to Schedule 1 to the Canadian Environmental Protection Act, 1999](#)

Vanadium pentoxide (Chemical Abstracts Service [CAS] Registry No. 1314-62-1), also known as V2O5; Oxirane, 2,2,2,2-[1,2-ethanediylidenetetrakis(4,1phenyleneoxymethylene)]tetrakis- (CAS No. 7328-97-4), hereafter referred to as "TGOPE"; Bromic acid, potassium salt (CAS No. 7758-01-2), also known as "Potassium bromate"; and Benzene, 1,2-dimethoxy-4-(2-propenyl)- (CAS No. 93-15-2), commonly called "Methyl eugenol."

[Significant New Activity Notice No. 16082](#)

2-Propenoic acid, 2-methyl-, polymer with 2-(substituted)alkyl 2-methyl-2-propenoate, 2-propenoic acid and polyfluoroalkyl 2-methyl-2-propenoate, acetate,

[Notice of intent to amend the Domestic Substances List under section 66 of the Canadian Environmental Protection Act, 1999 to indicate that two substances meet the reduced regulatory requirement polymer criteria](#)

[Notice of intent to amend the Domestic Substances List under subsection 87\(3\) of the Canadian Environmental Protection Act, 1999 to indicate that subsection 81\(3\) of that Act applies to six substances](#)

Bismuthine, triphenyl- (Chemical Abstracts Service; Cyclotetrasiloxane, heptamethylphenyl; Benzene, 1,1'-(chlorophenylmethylene)bis[4-methoxy; Phenol, 2-phenoxy-, trichloro deriv ; Siloxanes and Silicones, di-Me, reaction products with Me hydrogen siloxanes and 1,1,3,3-tetramethyldisiloxane; and Phenol, 4,4 -(1-methylethylidene)bis-, reaction products with hexakis(methoxymethyl) melamine.

[Regulations Amending the 2-Butoxyethanol Regulations](#)

The purpose of the Regulations is to protect the health of Canadians by limiting the concentration of 2-butoxyethanol (2-BE) in commercial and consumer products designed for indoor use. The substance 2-BE is a solvent used in products such as cleaners, paints and coatings.

[Order Adding Toxic Substances to Schedule 1 to the Canadian Environmental Protection Act, 1999](#)

Propane, 2-nitro- (Chemical Abstracts Service [CAS] Registry No. 79-46-9), hereafter referred to as "2-nitropropane"; Benzene, 1-methyl-2-nitro- (CAS No. 88-72-2), hereafter referred to as "2-nitrotoluene"; Phenol, 2,6-bis(1,1-dimethylethyl)-4-(1-methylpropyl)- (CAS No. 17540-75-9), hereafter referred to as "DTBSBP"; and Methylum, [4-(dimethylamino)phenyl]bis[4-(ethylamino)-3-methylphenyl]-, acetate (CAS No. 72102-55-7), hereafter referred to as "MAPBAP acetate."

[Food and Drug Regulations — Amendments](#)

Health Canada has received a submission to increase the maximum levels of use of erythritol in hard candies and chewing gum to 99% and 75% respectively. This submission would also extend the use of erythritol as a sweetener to the following unstandardized foods at the indicated maximum level of use: baked products and baking mixes (10%), cakes and cookies (10%), fruit spreads (14%), alcoholic beverages (3.5%), dairy-based beverages (2.5%), yogurt (7%), frozen desserts (5%), puddings (10%), syrups and toppings (15%), fruit, cream and custard fillings (10%), and fruit-based smoothie beverages (7%). Evaluation of available data supports the safety and effectiveness of erythritol, as a sweetener, in the production of these food products at the indicated maximum levels of use.

Motor Vehicle Safety

[Regulations Amending the Motor Vehicle Safety Regulations \(Motorcycle Brake Systems — Standard 122\)](#)

The Canadian safety standard is currently harmonized with the United States safety standard on motorcycle brake systems. Offering the European safety standard as an alternative, while also maintaining harmony with the United States safety standard, would facilitate the importation and exportation of motorcycles.

Environment and Health

Canadian Environmental Protection Act, 1999

[Publication of final decision on the assessment of a substance — Ethylene glycol, CAS No. 107-21-1 — specified on the Priority Substances List \(subsection 77\(6\) of the Canadian Environmental Protection Act, 1999\)](#)

Environment

[Regulations Amending the Gasoline Regulations](#)

The proposed Regulations Amending the Gasoline Regulations (the proposed Amendments) would provide an exemption for the production, import and sale of leaded gasoline in Canada for use in competition vehicles for an indeterminate period. Record-keeping and reporting requirements for producers, importers and sellers of leaded gasoline would remain in effect. Environment Canada, with the support of Health Canada, would work with domestic and international stakeholders, including the United States Environmental Protection Agency (U.S. EPA), to encourage a transition to non-leaded fuels, and would review the exemption within five years.

[Passenger Automobile and Light Truck Greenhouse Gas Emission Regulations](#)

The objective of the proposed Passenger Automobile and Light Truck Greenhouse Gas Emission Regulations (the proposed Regulations) is to reduce GHG emissions by establishing mandatory GHG emission standards for new vehicles of the 2011 and later model years that are aligned with U.S. standards.

[Renewable Fuels Regulations](#)

The proposed Renewable Fuels Regulations (proposed Regulations) are a key element of the Government's Renewable Fuels Strategy. (see footnote 2) The objective of the proposed Regulations is to reduce GHG emissions by mandating an average 5% renewable fuel content based on the gasoline volume, thereby contributing towards the protection of Canadians and the environment from the impacts of climate change.

[Proposed Regulations Amending the Gasoline Regulations](#) April 3, 2010 to June 2, 2010

This notice applies to: 1. Benzo[h]benz[5,6]acridino[2,1,9,8-klmna]acridine-8,16-dione (Chemical Abstracts Service [CAS] Registry No. 475-71-8); 2. Spiro[isobenzofuran-1(3H),9'-[9H]xanthen]-3-one, 2',4',5', 7'-tetrabromo-3',6'-dihydroxy-, lead salt

Marzo 2010

(CAS Registry No. 1326-05-2); 3. Benzo[b]thiophen-3(2H)-one, 4,7-dichloro-2-(4,7-dichloro-3-oxobenzo[b]thien-2(3H)-ylidene)- CAS Registry No. 14295-43-3); 4. Nickel, bis[1-[4-(dimethylamino)phenyl]-2-phenyl-1,2-ethenedithiolato(2-)-S,S']- (CAS Registry No. 38465-55-3); and 5. Benzoic acid, 4-[1-[[[(2,4-dichlorophenyl)amino]carbonyl]-3,3-dimethyl-2-oxobutoxy] (CAS Registry No. 58161-93-6).

Food and Drugs

[Food and Drug Regulations — Amendments](#) Interim Marketing Authorization

Health Canada has received a submission to permit the use of caffeine and caffeine citrate as food additives in non-alcoholic carbonated water-based flavoured and sweetened beverages other than cola type beverages. The maximum level of use of caffeine and caffeine citrate (calculated as caffeine), used singly or in combination in these beverages, would be 150 ppm in the finished product. This authorization is intended to provide for the addition of caffeine and caffeine citrate to the beverages commonly referred to as carbonated soft drinks, other than cola type soft drinks. This authorization does not change the provisions for the use of caffeine and caffeine citrate in cola type beverages, which will continue to be permitted at a maximum level of use of 200 ppm in the finished product.

[Food and Drug Regulations — Amendments](#) Interim Marketing Authorization

Health Canada has received a submission to permit the use of the enzyme amylase derived from a genetically modified *Bacillus licheniformis*, *Bacillus licheniformis* MDT06-228, that carries the gene from *Pseudomonas stutzeri* IAM1504 coding for this enzyme. This amylase will be used in the production of bread and unstandardized bakery products at levels consistent with good manufacturing practice. Evaluation of available data supports the safety and effectiveness of this amylase derived from *Bacillus licheniformis* MDT06-228 in these food products

Notices and Proposed Regulation

Agricultural Products

[Regulations Amending Certain Regulations Administered and Enforced by the Canadian Food Inspection Agency](#)

Canada's regulatory framework respecting the marketing of fresh fruit and vegetables compels dealers (persons handling fresh fruit and vegetables) licensed pursuant to the Licensing and Arbitration Regulations (LAR) to request a commercial quality inspection from the Canadian Food Inspection Agency (CFIA) when handling product that is alleged to have arrived in damaged or deteriorated condition. Studies and consultations undertaken by both industry and government over the past few years have led to the recognition that changes to the current delivery system for destination inspection services (DIS) and the regulatory framework that supports it are required to meet current marketplace and business needs, as well as to reinforce Canada's image as a reputable trader in foreign markets.
