UL WORKS TO PROTECT THE MARKET FROM COUNTERFEIT GOODS

IN 2015 ALONE, UL ASSISTED IN 506 SEIZURES, ELIMINATING MILLIONS OF DOLLARS OF COUNTERFEIT PRODUCTS FROM THE MARKET

1 OUT OF 3
FORTUNE 500
COMPANIES

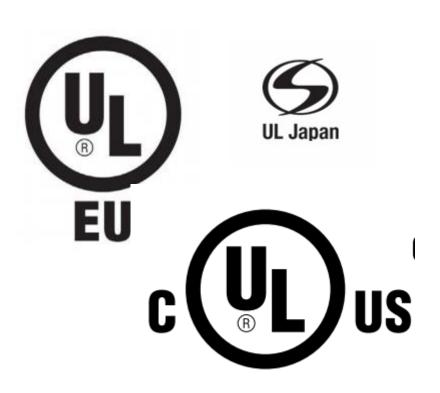

Conformity Assessment & Market Surveillance

• All conformity assessment methods need to be paired with effective market surveillance efforts.

- Responsibility for compliant products in the market belongs to all stakeholdersmanufacturers, government, consumers and 3rd parties.
- Method of conformity utilized must be considered when choosing market surveillance system:
 - Self Declaration approaches place greater burden on regulators and manufacturers to surveil marketplace including in resources and technical expertise.
 - 3rd Party approach incentivizes conformity assessment bodies to surveil marketplace.

UL & Market Surveillance

As the owner of UL Certification Marks, UL conducts proactive market surveillance based on trends and compliance data to safeguard our brand and Mark.

- UL Mark Schemes build in post-market surveillance requirements
- UL investigates 3,000 incidents/reports a year and implements appropriate corrective actions
- UL conducts Market Surveys by purchasing products from marketplace and verifying their compliance with safety requirements."
- UL works with law enforcement to identify counterfeit products. These products can then be seized by law enforcement

UL as a Partner to Government

EPA Energy Star

- Voluntary program that helps businesses and individuals save money and protect climate through superior energy efficiency.
- Currently, there are 23 recognized certification bodies for Energy Star.
- All ENERGY STAR certified products are subject to post-market verification testing (VT) administered by CBs.

OSHA NRTL Program

- OSHA's standards contain requirements for NRTL product testing and certification for 39 product types (eg. Portable fire extinguishers, Electrical conductors or equipment, Automatic shut-off devices)
- Currently, 19 NRTL's are recognized.
- NRTL's issue their own mark upon granting certification and must demonstrate to OSHA that they rigorously control use of their mark, including through market surveillance.

Thank you!
