INVITATION TO COMMENT ON UPDATE OF HEAVY VEHICLE EMISSION STANDARDS (ADR80/xx)

LTEC is seeking comment on a number of proposals in relation to the heavy vehicle emission standards ADR80/01 and ADR80/02. The Department of Transport and Regional Services is managing this consultation process on behalf of LTEC

The proposed changes to the ADRs reflect the inclusion of European on-board diagnostics (OBD), durability and related requirements as agreed by Transport & Environment Ministers in early 2005. Some of the proposed changes also respond to industry concerns regarding alternative US standards.

The proposed changes are explained in the [*LTEC Paper on Review of Heavy Vehicle Emission Standards*](#). The draft ADRs can also be downloaded from this page. [Appendix A](#) and [Appendix B](#) to the ADRs are also included as separate documents (the appendices are identical in both ADRs, so only the ADR80/02 versions are included).

Please note that the proposed changes to ADR80/01 will require it to be remade as [ADR80/02](#), and as a consequence, the proposed ADR80/02 will need to be renumbered as [ADR80/03](#). This is explained in more detail in the LTEC Paper.

Comments can be provided to the Department of Transport and Regional Services. Details on submitting comments are included in section 7 of the LTEC Paper. All comments must be provided in writing.

The closing date for receipt of comments is **cob Friday 15 September 2006**.
