

Description of content :

The Minimum Requirements for Radiopharmaceuticals shall be partially amended as follows ;

To establish the following article under The Minimum Requirements for Radiopharmaceuticals

Strontium chloride (^{89}Sr) injectable

To add the following 2 tests and 12 reagents, test solutions and etc. under the section of
GENERAL TESTS

Tests

Atomic Absorption Spectrometry

Measurement method of beta-ray

Reagents, test solutions and etc.

Strontium chloride hexahydrate

Hydrochloric Acid (10 vol%)

Potassium chloride solution (1w/v%)

Potassium-hydrochloric acid solution

Potassium chromate solution (0.5w/v%)

Hydrobromic acid (0.1mol/L)

Silver nitrate

Silver nitrate solution (0.05mol/L)

Silver nitrate reagent solution

Strontium standard solution

Strontium carbonate

Sodium sulfate
