## **Foreword**

Development of the East African Standards has been necessitated by the need for harmonizing requirements governing quality of products and services in the East African Community. It is envisaged that through harmonized standardization, trade barriers that are encountered when goods and services are exchanged within the Community will be removed.

The Community has established an East African Standards Committee (EASC) mandated to develop and issue East African Standards (EAS). The Committee is composed of representatives of the National Standards Bodies in Partner States, together with the representatives from the public and private sector organizations in the community.

East African Standards are developed through Technical Committees that are representative of key stakeholders including government, academia, consumer groups, private sector and other interested parties. Draft East African Standards are circulated to stakeholders through the National Standards Bodies in the Partner States. The comments received are discussed and incorporated before finalization of standards, in accordance with the Principles and procedures for development of East African Standards.

East African Standards are subject to review, to keep pace with technological advances. Users of the East African Standards are therefore expected to ensure that they always have the latest versions of the standards they are implementing.

Amendment 1. to East African Standard, EAS 90: 2019 was prepared by Technical Committee EASC/TC 001, Animal feeds and feeding stuffs

# Compounded Poultry feed — Specification

## Amendment 1: Total Aflatoxin, Aflatoxin B1

### 4.2 Table 1- specific nutritional requirements for compounded poultry feeds

*Delete*

<sup>a</sup>Not more than a seventh of the total phosphorus content may be derived from plant origin.

*And replace with*

<sup>a</sup>Not more than a 70% of the total phosphorus content may be derived from plant origin

### 6.1 Aflatoxin

Page 6, delete Table 2

**Table 2 — Maximum limits for aflatoxin**

S/N	Aflatoxin	Type of Poultry feed	Maximum limit, µg/kg	Test method
i	Total aflatoxin	Broiler finisher feed, Layers feed, Breeders feed	100	ISO 16050
		Chick starter feed, Broiler starter feed, Grower feed, Poults feed,	50	
ii	Aflatoxin B1	Broiler finisher feed, Layers feed, Breeders feed	20	ISO 14718
		Grower feed, Chick starter feed, Broiler starter feed, Poults feed,	10	ISO 17375

And replace the
