

PART 94—RINDERPEST, FOOT-AND-MOUTH DISEASE, FOWL PEST (FOWL PLAGUE), EXOTIC NEWCASTLE DISEASE, AFRICAN SWINE FEVER, CLASSICAL SWINE FEVER, AND BOVINE SPONGIFORM ENCEPHALOPATHY: PROHIBITED AND RESTRICTED IMPORTATIONS

10. The authority citation for part 94 would continue to read as follows:

Authority: 7 U.S.C. 450, 7701–7772, 7781–7786, and 8301–8317; 21 U.S.C. 136 and 136a; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.4.

§ 94.6 [Amended]

11. In § 94.6, paragraph (b)(1) would be removed and reserved.

Done in Washington, DC, this 20th day of March 2006.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF ENERGY

Office of Energy Efficiency and Renewable Energy

10 CFR Part 430 and 431

[Docket No. EE–2006–STD–0127]

RIN 1904–AB49

Energy Conservation Standards for Residential Electric and Gas Ranges and Microwave Ovens, Dishwashers, Dehumidifiers, and Commercial Clothes Washers: Public Meeting and Availability of the Framework Document

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice of public meeting and availability of the Framework Document.

SUMMARY: The Department of Energy (DOE or Department) will hold an informal public meeting to discuss and receive comments on issues it will address in this rulemaking proceeding. The Department is also initiating the data collection process for establishing energy conservation standards for residential electric and gas ranges and ovens and microwave ovens, dishwashers, dehumidifiers, and commercial clothes washers. The Department also encourages written comments on these subjects. In addition, this effort is the result of the Energy Policy Act of 2005 (EPACT 2005)

directive to publish a final rule to determine whether the standards established by EPACT 2005 should be amended no later than October 1, 2009, for dehumidifiers, and no later than January 1, 2010, for commercial clothes washers. To inform stakeholders and facilitate this process, DOE has prepared a Framework Document, a draft of which is available at: http://www.eere.energy.gov/buildings/appliance_standards/.

DATES: The Department will hold a public meeting on Thursday, April 27, 2006, from 9 a.m. to 5 p.m. in Washington, DC. Any person requesting to speak at the public meeting should submit a request to speak before 4 p.m., Thursday, April 13, 2006. The Department must receive a signed original and an electronic copy of statements to be given at the public meeting before 4 p.m., Thursday, April 13, 2006. Written comments are welcome, especially following the public meeting, and should be submitted by Thursday, May 11, 2006.

ADDRESSES: The public meeting will be held at the U.S. Department of Energy, Forrestal Building, Room GE–086 (Large Auditorium), 1000 Independence Avenue, SW., Washington, DC 20585–0121. (Please note that foreign nationals participating in the public meeting are subject to advance security screening procedures. If a foreign national wishes to participate in the workshop, please inform DOE of this fact as soon as possible by contacting Ms. Brenda Edwards-Jones at (202) 586–2945 so that the necessary procedures can be completed.)

Stakeholders may submit comments, identified by docket number EE–2006–STD–0127 and/or RIN number 1904–AB49, by any of the following methods:

- Federal eRulemaking Portal: <http://www.regulations.gov>. Follow the instructions for submitting comments.

- E-mail: home_appliance_rulemaking@ee.doe.gov. Include EE–2006–STD–0127 and/or RIN 1904–AB49 in the subject line of the message.

- Mail: Ms. Brenda Edwards-Jones, U.S. Department of Energy, Building Technologies Program, Mailstop EE–2J, Framework Document for Home Appliance Products, EE–2006–STD–0127 and/or RIN 1904–AB49, 1000 Independence Avenue, SW., Washington, DC 20585–0121. Telephone: (202) 586–2945. Please submit one signed paper original.

- Hand Delivery/Courier: Ms. Brenda Edwards-Jones, U.S. Department of Energy, Building Technologies Program, Room 1J–018, 1000 Independence

Avenue, SW., Washington, DC 20585–0121.

Instructions: All submissions received must include the agency name and docket number or Regulatory Information Number (RIN) for this rulemaking.

Docket: For access to the docket to read background documents, a copy of the transcript of the public meeting, or comments received, go to the U.S. Department of Energy, Forrestal Building, Room 1J–018 (Resource Room of the Building Technologies Program), 1000 Independence Avenue, SW., Washington, DC 20585–0121, (202) 586–9127, between 9 a.m. and 4 p.m., Monday through Friday, except Federal holidays. Please call Ms. Brenda Edwards-Jones at the above telephone number for additional information regarding visiting the Resource Room. Please note that the Department's Freedom of Information Reading Room (formerly Room 1E–190 at the Forrestal Building) is no longer housing rulemaking materials.

FOR FURTHER INFORMATION CONTACT:

Bryan Berringer, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies, EE–2J, 1000 Independence Avenue, SW., Washington, DC 20585–0121, (202) 586–0371. E-mail:

bryan.berringer@ee.doe.gov. Thomas DePriest, U.S. Department of Energy, Office of General Counsel, GC–72, 1000 Independence Avenue, SW., Washington, DC 20585–0121, (202) 586–9507. E-mail: Thomas.DePriest@hq.doe.gov.

SUPPLEMENTARY INFORMATION: Part B of Title III of the Energy Policy and Conservation Act of 1975 (EPCA), 42 U.S.C. 6291 *et seq.*, established an energy conservation program for major household appliances, which includes residential electric and gas ranges and ovens and microwave ovens, and dishwashers. This program authorizes the Department to establish technologically feasible, economically justified energy-efficiency regulations for certain consumer products for which such regulations would incur substantial national energy saving, and for which both natural market forces and voluntary labeling programs have been and/or are expected to be ineffective in promoting energy efficiency. The National Energy Conservation Policy Act of 1978 (NECPA) amended EPCA to add Part C of Title III, 42 U.S.C. 6311 *et seq.*, which established an energy-conservation program for certain industrial equipment. Amendments to EPCA in

the Energy Conservation Act of 1987 (NAECA) established prescriptive energy conservation standards for dishwashers and cooking products, as well as requirements for determining whether these standards should be amended. (42 U.S.C. 6295(g) and (h)) The Energy Policy Act of 1992 (EPACT 1992), Public Law 102-486, included amendments to EPCA that expanded Title III to include certain commercial equipment. The recent Energy Policy Act of 2005 (EPACT 2005), Public Law 109-58, updated several existing standards and test procedures, prescribed definitions, standards, and test procedures for certain new consumer products and commercial equipment, and mandated that the Secretary of Energy (the Secretary) commence rulemakings to develop test procedures and standards for certain other new consumer products and commercial equipment, including dehumidifiers and commercial clothes washers.

The prescriptive standards for dishwashers in EPCA, as amended, require that they be equipped with an option to dry without heat, and EPCA further requires that DOE conduct two cycles of rulemakings to determine if more stringent standards are justified. (42 U.S.C. 6295(g)(1), (4)) On May 14, 1991, DOE issued a final rule establishing the first set of performance standards for dishwashers; the new standards became effective on May 14, 1994. 56 FR 22250. The Department initiated a second standards rulemaking for dishwashers by issuing an advance notice of proposed rulemaking (ANOPR) on November 14, 1994. 59 FR 56423. As a result of the priority-setting process outlined in the July 15, 1996, Procedures for Consideration of New or Revised Energy Conservation Standards for Consumer Products (the "Process Rule"), 61 FR 36974, 10 CFR part 430, Subpart C, Appendix A, DOE suspended the standards rulemaking for dishwashers.

The prescriptive standards for gas cooking products in EPCA, as amended, require units with an electrical supply cord not to be equipped with constant burning pilots. EPCA, as amended, also directs DOE to conduct two cycles of rulemakings to determine if more stringent standards are justified. (42 U.S.C. 6295(h)) The Department initially analyzed standards for cooking products as part of an eight-product standards rulemaking. It issued a notice of proposed rulemaking (NOPR) on March 4, 1994, proposing performance standards for gas and electric residential cooking products, including microwave ovens. 59 FR 10464. In accordance with

the 1996 Process Rule, DOE refined its standards analysis of cooking products. With regard to gas cooking products, DOE focused on the economic justification for eliminating standing pilots. Partially due to the difficulty of conclusively demonstrating that elimination of standing pilots was economically justified, DOE issued a final rule on September 8, 1998, that covered only electric cooking products, including microwave ovens. 63 FR 48038. The final rule found that no standards were feasible for electric cooking products. The Department never completed its standards rulemaking for gas cooking products.

Commercial clothes washers and dehumidifiers are new products covered by the EPACT 2005 legislation. Commercial clothes washers are defined in EPACT 2005 as soft-mount, front-loading or soft-mount, top-loading washers that have a clothes container compartment that is not more than 3.5 cubic feet for horizontal-axis clothes washers and not more than 4.0 cubic feet for vertical-axis clothes washers. (EPACT 2005, section 136(a)(4)) EPACT 2005 also defines commercial clothes washers as products designed for applications in which the occupants of more than one household will be using the clothes washer, such as multi-family housing common areas, coin laundries, or other commercial applications. (*Id.*) EPACT 2005 established standards for commercial clothes washers, which will become effective on January 1, 2007. (EPACT 2005, section 136(e)) EPACT 2005 also requires that DOE issue a final rule by January 1, 2010, to determine whether these standards should be amended. (*Id.*)

In EPACT 2005, dehumidifiers are defined as self-contained, electrically operated, and mechanically encased assemblies consisting of: (1) A refrigerated surface (evaporator) that condenses moisture from the atmosphere; (2) a refrigerating system, including an electric motor; (3) an air-circulating fan; and (4) a means for collecting or disposing of the condensate. (EPACT 2005, section 135(a)(3)) EPACT 2005 established standards for dehumidifiers that will become effective on October 1, 2007. (Section 135(c)(4)) EPACT 2005 also requires that DOE issue a final rule by October 1, 2009, to determine whether these standards should be amended. (*Id.*) If amended standards are justified, EPACT 2005 requires them to become effective by October 1, 2012. (*Id.*) In the event that DOE fails to publish a final rule, EPACT 2005 specifies a new set of amended standards with an effective date of October 1, 2012. (*Id.*)

To begin the required rulemaking process, the Department prepared the Framework Document to explain the issues, analyses, and process it is considering for the development of energy efficiency standards for residential electric and gas ranges and ovens and microwave ovens, dishwashers, dehumidifiers, and commercial clothes washers. The focus of the public meeting will be to discuss the analyses and issues contained in various sections of the Framework Document. For each item listed, the Department will make a presentation with discussion to follow. In addition, the Department will also make a brief presentation on the rulemaking process for these products. The Department encourages those who wish to participate in the public meeting to obtain the Framework Document and be prepared to discuss its contents. A copy of the draft Framework Document is available at: http://www.eere.energy.gov/buildings/appliance_standards/. However, public meeting participants need not limit their discussions to the topics in the Framework Document. The Department is also interested in receiving views concerning other relevant issues that participants believe would affect energy conservation standards for these products. The Department also welcomes all interested parties, whether or not they participate in the public meeting, to submit in writing by Thursday, May 11, 2006, comments and information on the matters addressed in the Framework Document and on other matters relevant to consideration of standards for residential electric and gas ranges and ovens and microwave ovens, dishwashers, dehumidifiers, and commercial clothes washers.

The public meeting will be conducted in an informal, conference style. A court reporter will be present to record the minutes of the meeting. There shall be no discussion of proprietary information, costs or prices, market shares, or other commercial matters regulated by the U.S. antitrust laws.

After the public meeting and the expiration of the period for submitting written statements, the Department will begin collecting data, conducting the analyses as discussed at the public meeting, and reviewing the comments received.

Anyone who would like to participate in the public meeting, receive meeting materials, or be added to the DOE mailing list to receive future notices and information regarding residential electric and gas ranges and ovens and microwave ovens, dishwashers, dehumidifiers, and commercial clothes

washers, should contact Ms. Brenda Edwards-Jones at (202) 586-2945.

Issued in Washington, DC, on March 21, 2006.

Douglas L. Faulkner,

Acting Assistant Secretary, Energy Efficiency and Renewable Energy.

BILLING CODE 6450-01-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2006-24018; Directorate Identifier 2006-CE-15-AD]

RIN 2120-AA64

Airworthiness Directives; Pacific Aerospace Corporation Ltd. Model 750XL Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for certain Pacific Aerospace Corporation Ltd. Model 750XL airplanes. This proposed AD would require you to inspect the condition of the insulation of the wiring adjacent to the electrical plugs mounted in the left-hand (LH) and right-hand (RH) sides of the forward end of the cockpit center console for signs of abrasion and arcing. If you find evidence of abrasion or arcing, this proposed AD would require you to replace the affected wire(s) and secure the wires away from the back shells of the electrical plugs. This proposed AD results from mandatory continuing airworthiness information (MCAI) issued by the airworthiness authority for New Zealand. We are proposing this AD to detect and correct damaged wires on the LH and RH sides of the forward end of the cockpit center console, which could result in short-circuiting of the related wiring. This could lead to electrical failure of affected systems and potential fire in the cockpit.

DATES: We must receive comments on this proposed AD by April 24, 2006.

ADDRESSES: Use one of the following addresses to comment on this proposed AD:

- DOT Docket Web site: Go to <http://dms.dot.gov> and follow the instructions for sending your comments electronically.

- Government-wide rulemaking Web site: Go to <http://www.regulations.gov>

and follow the instructions for sending your comments electronically.

- Mail: Docket Management Facility; U.S. Department of Transportation, 400 Seventh Street, SW., Nassif Building, Room PL-401, Washington, DC 20590-0001.

- Fax: (202) 493-2251.

- Hand Delivery: Room PL-401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this proposed AD, contact Pacific Aerospace Corporation Ltd., Hamilton Airport, Private Bag HN 3027, Hamilton, New Zealand; telephone: 011 (64) 7-843-6144; fax: 011 (64) 7-843-6134.

FOR FURTHER INFORMATION CONTACT: Karl Schletzbaum, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329-4146; facsimile: (816) 329-4090.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments regarding this proposed airworthiness directive (AD). Send your comments to an address listed under the **ADDRESSES** section. Include the docket number, "FAA-2006-24018; Directorate Identifier 2006-CE-15-AD" at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of the proposed AD. We will consider all comments received by the closing date and may amend the proposed AD in light of those comments.

We will post all comments we receive, without change, to <http://dms.dot.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive concerning this proposed AD.

Discussion

The Civil Aviation Authority (CAA), which is the airworthiness authority for New Zealand, notified the Federal Aviation Administration (FAA) that an unsafe condition may exist on certain Pacific Aerospace Corporation Ltd. (Pacific Aerospace) Model 750XL airplanes. The CAA reports an incident in which short-circuiting of the wiring in the cockpit center console occurred.

Abrasion of the wiring insulation caused by the fasteners of the electrical plug back-shells located in the cockpit center console resulted in the short-circuit.

This condition, if not corrected, could result in short-circuiting of the related wiring in the forward end of the cockpit center console. This could lead to electrical failure of affected systems and potential fire in the cockpit.

Relevant Service Information

We have reviewed Pacific Aerospace Corporation Mandatory Service Bulletin No. PACSB/XL/016, Issue 1, Date Issued: September 23, 2005.

The service information describes procedures for:

- Inspecting the condition of the insulation of the wiring adjacent to the electrical plugs mounted in the left-hand (LH) and (RH) right-hand sides of the forward end of the cockpit center console for signs of abrasion and arcing;
- Replacing the affected wire(s) if any evidence of abrasion or arcing is found; and
- Securing the wires away from the back shells of the electrical plugs.

Foreign Airworthiness Authority Information

The CAA classified this service bulletin as mandatory and issued New Zealand AD Number DCA/750XL/6, Effective Date: December 1, 2005, to ensure the continued airworthiness of these airplanes in New Zealand.

These Pacific Aerospace Model 750XL airplanes are manufactured in New Zealand and are type-certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement.

Under this bilateral airworthiness agreement, the CAA has kept us informed of the situation described above.

FAA's Determination and Requirements of the Proposed AD

We are proposing this AD because we have examined the CAA's findings, evaluated all information and determined the unsafe condition described previously is likely to exist or develop on other products of the same type design that are certificated for operation in the United States.

This proposed AD would require you to inspect the condition of the insulation of the wiring adjacent to the electrical plugs mounted in the LH and RH sides of the forward end of the cockpit center console for signs of abrasion and arcing. If any evidence of abrasion or arcing is found, this proposed AD would require you to replace the affected wire(s) and secure the wires away from the back shells of the electrical plugs.
