[Add new item 3.9 as follows:]

3.9 Move Update Standard

3.9.1 Basic Standards

The Move Update standard is a means of reducing the number of mailpieces in a mailing that require forwarding, return, or discard by the periodic matching of a mailer's address records with customer-filed change-of-address orders received and maintained by the USPS. For the purposes of this standard, "address" means a specific address associated with a specific occupant name. Addresses subject to the Move Update standard must meet these requirements:

a. Each address and associated occupant name used on the mailpieces in a mailing must be updated within 95 days before the mailing date, with one of the USPS-approved methods in 3.9.2.

b. Each individual address in the mailing is subject to the Move Update standard.

c. The Move Update standard is met when an address used on a mailpiece in a mailing at any class of mail is updated with an approved method in 3.9.2, and the same address is used in a Standard Mail mailing within 95 days after the address has been updated.

d. Except for mail bearing an alternative address format, addresses used on pieces claiming Standard Mail rates, regardless of any required surcharge, must meet the Move Update standard.

3.9.2 USPS-Approved Methods

The following methods are authorized for meeting the Move Update standard:

a. Address Change Service (ACS).

b. National Change of Address Linkage System (NCOALink).

c. Ancillary service endorsements under 507.1.5.3, Standard Mail, except "Forwarding Service Requested."

3.9.3 Mailer Certification

The mailer's signature on the postage statement certifies that the Move Update

standard has been met for each address in the corresponding mailing presented to the USPS.
